LAZARD CREDIT OPPORTUNITIES

Sub-fund of the LAZARD FUNDS SICAV

This Sub-fund of UCITS is managed by LAZARD FRERES GESTION SAS
FR0013432143 - PVC EUR

Objective and Investment Policy

Classification of the Sub-fund: International bonds and other debt securities

Investment objective: The investment objective is to achieve over the recommended investment horizon of 3 years a return (net of charges) above the following benchmark: €STR Capitalisé +2,40%. The benchmark is expressed in EUR.

Investment policy: The strategy used to achieve this objective involves dynamic management of interest rate risk, credit risk and currency risk by investing primarily in risky debt issued by governments, companies, and financial institutions and structures.

The Fund's modified duration will be managed dynamically within a range of -5 and +10.

The Fund is invested as follows:

- Up to a maximum of 100% of the net assets in bonds and negotiable debt securities denominated in euros and/or any other currency, without any restriction in terms of credit quality.
- Up to a maximum of 60% of the net assets in bonds and negotiable debt securities denominated in currencies other than the euro and the US dollar. Up to a maximum of 10% of the net assets in UCITS and French or foreign AIF that comply with the four criteria set out in Article R.214-13 of the French monetary and financial code (Code monétaire et financier) and classified as money market, short-term money market or bond funds. These UCIs may be managed by the management company.
- Up to a maximum of 5% of the net assets in ordinary shares deriving from debt restructuring. The fund manager will do their best to sell the shares received as soon as possible in the interest of the shareholders.
- Up to a maximum of 10% of the net assets in convertible bonds.
- Up to a maximum of 50% of the net assets in perpetual subordinated debt, including a maximum of 30% of the net assets in contingent convertible bonds (CoCos).
- Up to a maximum of 5% of the net assets in preference shares.

The Sub-fund may use interest rate and currency futures, interest rate and currency options, interest rate and currency swaps, currency forward transactions and credit derivatives traded on regulated, organised and/or OTC markets for hedging and/or exposure purposes, thereby taking the Sub-fund's exposure beyond 100% of the net assets.

The portfolio is exposed to interest rate, foreign exchange, credit and volatility risk, at a fixed threshold calculated based on the absolute VaR. The VaR level must remain lower than 15% and leverage must not exceed 400% gross.

The Sub-fund may invest a maximum of 100% of the net assets in securities with embedded derivatives.

Allocation of distributable income:

Allocation of net income: Accumulation

Allocation of net realised capital gains: Accumulation

Other information : Environmental, social and governance (ESG) criteria are integrated into management through an internal analysis and rating model that directly influences management without being a determining factor in decision-making

Recommended investment period: This Sub-fund may not be suitable for investors planning to withdraw their contributions within 3 years.

Redemption option: Orders are executed as indicated in the table below

Business d	Day on which NAV is set (d)	Business d+1	Business d+2
Daily order reception and daily centralisation of redemption orders before 12:00 a.m. (Paris time)	Order executed by the latest on d	Publication of the net asset value	Settlement of redemptions

Risk and reward profile

Explanation of the indicator and its main limitations:

The diversified exposure to interest rate and foreign exchange risk explains the UCI's classification in this category. The historical data used may not provide a reliable indication of the Sub-fund's future risk profile.

We can give no assurance that the category displayed will not change, and the classification may change over time.

The lowest category does not imply a risk-free investment. There is no capital guarantee.

Other material risk factors not incorporated into the indicator:

- **Credit Risk:** represents the potential risk that an issuer defaults or its creditworthiness declines, which would lead to a fall in the price of its securities and, hence, a decrease in the Fund's net asset value.
- **Risks associated with derivatives:** Use of complex products such as derivatives may increase losses.

The materialisation of one of these risks may result in a decline in the net asset value of the Sub-fund. The other risks are stipulated in the prospectus.
