Objective and Investment Policy

Classification of the UCI: Eurozone country equities

Investment objective: The investment objective is to achieve, by applying a Socially Responsible Investment (SRI) management approach, over the recommended investment horizon of 5 years, a return (net of charges) above the following benchmark: Eurostoxx. The benchmark is expressed in EUR. Nets dividends or coupons are reinvested.

Investment policy: The Fund intends to achieve this investment objective through discretionary management and by investing in equities of all market capitalisations with one or more of the following characteristics:

- the capacity to generate positive operating cash flows after investment,
- a balance sheet structure with little or no debt or a net cash position,
- the opportunity to sell assets and return the proceeds to shareholders,
- a weighted average return of the companies in the Fund above the average for listed companies in the Eurozone,
- an active share buy-back policy,
- a stable dividend policy,
- significant distribution of income or the ability to do so.

The portfolio is constructed with the goal of reducing its ex-ante volatility by over 25% relative to its benchmark. To do this, the manager performs a quantitative analysis of each portfolio security's marginal contribution to volatility, using internal tools. The manager also introduces a qualitative stock selection filter. However, the volatility reduction objective is a relative target and the Fund remains exposed to equity market volatility. Similarly, the objective does not guarantee a reduction in ex-post volatility and there are no constraints to that effect.

The portfolio shall be invested as follows:

- a minimum of 90% of the net assets in the equities markets, of which a minimum of 75% of the net assets in the Eurozone equities market,
 - a maximum of 10% of the net assets may be invested in bonds.
- A maximum of 10% of the net assets may be invested in French UCIs.

For the purpose of cash management, the Fund may invest in money market UCI, French short-term money market instruments and French and foreign negotiable debt securities with any credit rating. Investment is solely in UCIs that in turn invest less than 10% of their assets in other UCIs.

These UCIs may be managed by the management company.

The Fund may invest up to the amount of the net assets (without seeking overexposure) in equity and equity index futures on regulated, organised and/or OTC markets to hedge the portfolio against equity risk, volatility and/or dividend risk. A maximum of 10% of the Fund's net assets may be invested in securities with embedded derivatives.

Allocation of distributable income:

Allocation of net income: Distribution

Allocation of net realised capital gains: Accumulation and/or Distribution and/or Retention

Risk and reward profile

Explanation of the indicator and its main limitations:

The exposure to the equity market explains the UCI's classification in this category.

The historical data used may not provide a reliable indication of the UCI's future risk profile.

We can give no assurance that the category displayed will not change, and the classification may change over time.

The lowest category does not imply a risk-free investment. There is no capital guarantee.

Other material risk factors not incorporated into the indicator:

- Risks associated with derivatives: Use of complex products such as derivatives may increase losses.

The materialisation of one of these risks may result in a decline in the net asset value of the UCI. The other risks are stipulated in the prospectus.

Charges

The charges and fees paid are used to cover the UCI's operating expenses, including the costs of marketing and distributing its units. These charges reduce the investments' potential growth.
