Objective and Investment Policy

Classification of the UCI: Eurozone country equities

Investment objective: The investment objective is to achieve over the recommended investment horizon of 5 years, a return (net of charges) above the following benchmark: Eurostoxx. The benchmark is expressed in EUR. Nets dividends or coupons are reinvested.

Investment policy: To achieve this objective, the Fund will invest in large Eurozone companies that achieve the best economic performance over the long-term. The strategy implemented is based on:
- identifying these companies;
- verifying that performance through financial analysis and examining the strategic underpinnings of performance;
- selecting stocks from such companies according to the market's undervaluation of that performance at a given time;
- building a diversified portfolio within the Eurozone but with no other geographical or sectoral restrictions.

The portfolio is made up as follows:
- At least 90% of net assets are invested in shares, predominantly large caps listed and/or domiciled in the Eurozone, although this is an objective rather than a constraint.
- Up to a maximum of 10% of the net assets in French UCITS or French AIF.

For the purpose of cash management, the Fund may invest in money market UCI, French short-term money market instruments and/or French and foreign negotiable debt securities.

Investment is solely in UCIs that in turn invest less than 10% of their assets in other UCIs. All UCIs may be managed by the management company.

The Fund may use equity and equity index futures and/or equity and equity index options traded on regulated, organised and/or OTC markets to hedge the portfolio against equity risk.

Allocation of distributable income:
Allocation of net income: Accumulation and/or Distribution and/or Retention
Allocation of net realised capital gains: Accumulation and/or Distribution and/or Retention

This UCI is eligible for inclusion in French personal savings plans (PEA).

Recommended investment period: This UCI may not be suitable for investors planning to withdraw their contributions within 5 years.

Explanation of the indicator and its main limitations:
The exposure to the equity market explains the UCI's classification in this category.
The historical data used may not provide a reliable indication of the UCI's future risk profile.
We can give no assurance that the category displayed will not change, and the classification may change over time.
The lowest category does not imply a risk-free investment. There is no capital guarantee.

Other material risk factors not incorporated into the indicator:

- Risks associated with derivatives: Use of complex products such as derivatives may increase losses.

The materialisation of one of these risks may result in a decline in the net asset value of the UCI. The other risks are stipulated in the prospectus.
