1. CHARACTERISTICS OF THE UCI

- **LEGAL FORM**

French open-end investment company (Société d'Investissement à Capital Variable - SICAV) with a board of directors

- **ALLOCATION OF DISTRIBUTABLE INCOME**

Distributable income consists of:

1) net income plus retained earnings, plus or minus the balance of the revenue adjustment account.

Net income for the financial year is equal to the amount of interest, arrears, dividends, bonuses and prizes, directors' fees and all income generated by the securities that make up the SICAV's portfolio, plus income generated by temporary cash holdings and minus management fees and borrowing costs.

2) realised capital gains, net of charges, minus realised capital losses, net of charges, recognised for the financial year, plus any net capital gains of the same kind recognised over previous years that have not been distributed or accumulated, plus or minus the balance of the capital gains adjustment account.

The amounts referred to in 1) and 2) may be accumulated and/or distributed and/or retained independently of each other, in whole or in part.

For the K and T H-EUR shares, the shareholders' meeting decides each year on the allocation of distributable income. It may pay interim dividends.

For the IC EUR, RC EUR, TC EUR, RC H-EUR, IC USD, IC H-EUR, RC USD, TC GBP, RC H- USD, IC H-USD, RC H-HKD, RC H-SGD and IC H-CHF shares, distributable income shall be fully accumulated, with the exception of those amounts subject to compulsory distribution by law.

For the ID EUR, RD EUR, RD USD, TD GBP, RD H-USD and ID H-EUR shares, net income shall be fully distributed and the allocation of net realised capital gains shall be decided each year by the management company. It may pay interim dividends.

- **INVESTMENT OBJECTIVE**

Investment objective of the IC EUR, RC EUR, ID EUR, TC EUR, RD EUR and K shares:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Global Focus Convertible Bond Index (EUR) (net interest reinvested), expressed in euros, over the recommended investment horizon of five years.

- Investment objective of the IC USD, RC USD and RD USD shares:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Convertible Global Focus USD index (net interest reinvested), expressed in US dollars, over the recommended investment horizon of five years.

- Investment objective of the TC GBP and TD GBP shares:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Global Focus Convertible Bond Index (GBP) (net interest reinvested), expressed in pounds sterling, over the recommended investment horizon of five years.

- Investment objective of the RC H- USD, RD H-USD et IC H-USD shares:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Global Focus Hedged (USD) Convertible Bond Index (net interest reinvested), expressed in US dollars and hedged against foreign exchange risk with the US dollar as the base currency, over the recommended investment horizon of five years. The share's performance may be impacted by possible foreign exchange hedging costs.

- Investment objective of the RC H- HKD share:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Global Focus Hedged (USD) Convertible Bond Index (net interest reinvested), expressed in Hong Kong dollars and hedged against foreign exchange risk with the Hong Kong dollar as the base currency, over the recommended

investment horizon of five years. The share's performance may be impacted by possible foreign exchange hedging costs.

- Investment objective of the RC H- SGD share:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Global Focus Hedged (USD) Convertible Bond Index (net interest reinvested), expressed in Singapore dollars and hedged against foreign exchange risk with the Singapore dollar as the base currency, over the recommended investment horizon of five years. The share's performance may be impacted by possible foreign exchange hedging costs.

- Investment objective of the IC H- EUR, ID H-EUR, RC H-EUR and TH- EUR shares:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Global Focus Hedged (EUR) Convertible Bond Index (net interest reinvested), expressed in euros, hedged against foreign exchange risk with the euro as the base currency, over the recommended investment horizon of five years. The share's performance may be impacted by possible foreign exchange hedging costs.

- Investment objective of the IC H- CHF share:

The investment objective is to achieve a return (net of charges) above the Thomson Reuters Global Focus Hedged Convertible Bond Index (CHF) (net interest reinvested), expressed in Swiss francs, hedged against foreign exchange risk with the Swiss franc as the base currency, over the recommended investment horizon of five years. The share's performance may be impacted by possible foreign exchange hedging costs.

• BENCHMARK

- Benchmark IC EUR, RC EUR, ID EUR, TC EUR, RD EUR and K shares:

The Thomson Reuters Global Focus Convertible Bond Index (EUR) (net interest reinvested), expressed in euros. It reflects the performance of global convertible bonds and can be accessed on the Bloomberg Terminal (UCBIFOCE) and the UBS website (with access code, ref. UCBINDEXW1414).

- Benchmark IC USD, RC USD and RD USD shares:

The Thomson Reuters Global Focus Convertible Bond Index (USD) (net interest reinvested), expressed in dollars. It reflects the performance of global convertible bonds and can be accessed on the Bloomberg terminal (UICBFOCU).

- Benchmark TC GBP and TD GBP shares:

The Thomson Reuters Global Focus Convertible Bond Index (GBP) (net interest reinvested), expressed in Pound sterling. It reflects the performance of global convertible bonds and can be accessed on the Bloomberg terminal (UCBIGLFG) and the UBS website (with access code, ref. UCBINDEX1545).

- Benchmark RC H-USD, RD H-USD and IC H-USD shares:

The Thomson Reuters Global Focus Hedged (EUR) Convertible Bond Index (net interest reinvested), expressed in US dollars, hedged against foreign exchange risk with the US dollar as the base currency. It reflects the performance of global convertible bonds, hedged against foreign exchange risk with the US dollar as the base currency and can be accessed on the Bloomberg terminal (UCBIFX02) and the UBS website (with access code, ref. UCBINDEXW1058).

- Benchmark RC H-HKD shares:

The Thomson Reuters Global Focus Hedged (EUR) Convertible Bond Index (net interest reinvested), expressed in Hong Kong dollars, hedged against foreign exchange risk with the Hong Kong dollar as the base currency. It reflects the performance of global convertible bonds, hedged against foreign exchange risk with the Hong Kong dollar as the base currency.

- Benchmark RC H-SGD shares:

The Thomson Reuters Global Focus Hedged (EUR) Convertible Bond Index (net interest reinvested), expressed in Singapore dollars, hedged against foreign exchange risk with the Singapore dollar as the base currency. It reflects the performance of global convertible bonds, hedged against foreign exchange risk with the Singapore dollar as the base currency.

- Benchmark IC H-EUR, ID H-EUR, RC H-EUR and TH-EUR shares:

The Thomson Reuters Global Focus Hedged (EUR) Convertible Bond Index (net interest reinvested), expressed in euros, hedged against foreign exchange risk with the euro as the base currency. It reflects the performance of global convertible bonds, hedged against foreign exchange risk with the euro as the base currency and can be accessed on the Bloomberg terminal (UCBIFX14) and the UBS website (with access code, ref. UCBINDEXW1059).

- Benchmark IC H- CHF shares:

The Thomson Reuters Global Focus Hedged (CHF), Convertible Bond Index (net interest reinvested), expressed in Swiss francs, hedged against foreign exchange risk with the Swiss franc as the base currency. It reflects the performance of global convertible bonds, hedged against foreign exchange risk with the Swiss franc as the base currency and can be accessed on the Bloomberg terminal (UCBIFX28) and the UBS website (with access code, ref. UCBINDEXW1068).

• INVESTMENT STRATEGY

1. Strategies used

The SICAV is actively managed using a fundamental approach comprising several analysis phases: study of the economic environment with market expectations produced by the Economic Strategy department, financial analysis of companies issuing bonds and of underlying equities and analysis of the technical features of issuance contracts.

To this end, the manager will manage the SICAV's overall exposure to interest rates and equity markets. In addition to the characteristics of the portfolio assets (exposure, equities and sensitivity), the manager will use interest-rate and equity futures to increase or decrease the SICAV's sensitivity or exposure to the equity market.

Furthermore, the SICAV will manage currency risk dynamically for shares that are not hedged against foreign exchange risk, in order to optimise performance in the medium term.

The SICAV may also actively manage interest rates through active management of the modified duration (use of BOBL or bund futures, for instance).

The SICAV may use futures, swaps, options and forward foreign-exchange contracts on regulated, organised and/or OTC markets, up to the amount of the net assets (without overexposure), in order to hedge the portfolio and/or expose it to equity, interest rate, exchange rate, credit and volatility risk.

2. Assets (excluding embedded derivatives)

Equities:

Shares in live securities (excluding "Preferred Convertibles") deriving from the conversion of one of the types of instrument defined below, to a maximum of 10% of net assets.

Debt securities and money market instruments:

- - European and foreign (including emerging) convertible bonds denominated in euros and/or in local currencies issued by companies and financial institutions and equivalent ("Preferred Convertibles").

- European and foreign (including emerging) bonds exchangeable for shares denominated in euros and/or in local currencies issued by companies and financial institutions.

- European and foreign (including emerging) bonds with share warrants denominated in euros and/or in local currencies issued by companies and financial institutions.

- European and foreign (including emerging) bonds with warrants for participating securities denominated in euros and/or in local currencies issued by companies and financial institutions.

- Bonds whose value is indexed to a stock market index to a maximum of 15% of net assets.

- Up to 10% of net assets, may be invested in negotiable debt securities, repurchase agreements, etc.

UCIs:

French or foreign money-market, short-term money-market, bond or mixed UCITS or AIFs that meet the four criteria of Article R. 214-13 of the French Monetary and Financial Code (Code Monétaire et Financier), to a maximum of 10% of net assets.

These UCIs may be managed by the management company.

3. Derivatives

- Types of markets:

regulated

organised

OTC

- The manager intends to seek exposure to:

shares

interest rates

foreign exchange

credit

other: volatility

- Types of transactions – all transactions must be limited to achieving the investment objective:

hedging

exposure

arbitrage

other

- Types of instruments used:

futures:

equity and equity index

interest rate

currency

options:

equity and equity index

interest rate

currency

swaps:

equity swaps

interest rate swaps

currency swaps

currency forwards

credit derivatives

- Derivatives strategy to achieve the investment objective:

partial or general portfolio hedging

creating synthetic exposure to assets and risks

increasing exposure to the market without leverage

maximum permitted and sought

other strategy

4. Securities with embedded derivatives

The manager may invest in all securities with embedded derivatives that are permitted under the management company's business plan, notably convertible bonds and warrants traded on regulated, organised and OTC markets, up to 100% of the net assets.

Within this framework, the manager may take positions with a view to hedging the portfolio against and/or exposing it to particular business sectors, geographic regions, shares (all capitalisation types), stocks and similar securities in order to achieve the investment objective.

5. Deposits:

Up to 10% of the SICAV's assets may be held in deposits.

6. Cash borrowings:

The SICAV may borrow cash within the limit of 10% of its assets to meet specific cash requirements related to its operating needs.

7. Temporary purchases and sales of securities:

None.

8. Information on financial guarantees:

In order to achieve its investment objective, the SICAV may receive and provide financial guarantees.

In connection with over-the-counter derivative transactions, and in accordance with Position paper 2013-06 issued by the French financial markets regulator (*Autorité des Marchés Financiers* – AMF), the SICAV may receive collateral in the form of securities (such as bonds or other securities issued or guaranteed by a State or issued by international financing agencies and bonds or securities issued by high quality corporate issuers), or cash.

Any cash collateral received is reinvested in accordance with the applicable rules.

All such assets must be from high-quality issuers that are not an entity of the counterparty or its group, and must be liquid and diversified with low volatility.

Discounts may be applied to the collateral received; they take into account the quality of credit and the price volatility of the securities.

• RISK PROFILE

Your money will be mainly invested in financial instruments selected by the management company. These instruments will be exposed to market trends and fluctuations.

The risks associated with the SICAV are interest rate risk, credit risk, equity risk, foreign exchange risk and changes in the volatility of options.

Risk of capital loss:

The SICAV is not guaranteed or protected and therefore there is a possibility that you may not get back the full amount of your initial investment. The risk is incurred when the net asset value falls, in which case investors are not guaranteed to get back the money originally invested.

Equity risk:

Exposure to fluctuations in equity markets may generate significant changes in net asset value. The SICAV's net asset value may decrease during periods in which the equity markets are falling.

Interest rate risk:

Interest rate risk is the risk of a change in interest rates, which has an impact on the bond markets, such as the tendency for bond prices to move in the opposite direction to interest rates. If interest rates rise, the SICAV's net asset value may fall.

Credit risk:

The issuer of a bond may default, and this could decrease the SICAV's net asset value. Even in cases where the issuer has not defaulted, changes in credit spreads could give rise to a negative performance. The risk may be even greater if the issuer's credit quality is low, whether the issuer is in the speculative/high yield category and/or connected to emerging markets.

The decline in net asset value could be even greater if the SICAV is invested in unrated or speculative/high yield debt, or in emerging market debt.

- Currency risk (IC EUR, RC EUR, K, TC EUR, ID EUR, RD EUR, TC GBP, TD GBP, RC USD, RD USD and IC USD only):

Investing in the fixed-income markets of countries outside the Eurozone generates exposure to foreign exchange risk and could lead to greater volatility.

Volatility risk:

Given the options attached to securities, changes in volatility, which is the main component of the option price, could give rise to a decrease in the SICAV's net asset value for an indeterminate period.

Derivatives risk:

The SICAV may be synthetically exposed up to 100% of its net assets to fixed-income and/or index-related instruments. The use of derivatives on organised and OTC markets may expose the net asset value to variations due to fluctuations in the underlying markets.

Counterparty risk:

This is the risk associated with the SICAV's use of over-the-counter financial forwards. An operation of this type with one or more eligible counterparties potentially exposes the SICAV to a risk of insolvency related to one or more of these counterparties, which could lead to default on payment.

Emerging market risk:

The main risks relating to investments in emerging countries may be due to the sharp movements in security and currency prices in these countries, potential political instability and accounting and financial practices that are less rigorous than in the developed countries.

The SICAV's net asset value could fall in the event of a downward movement in these markets.

- **GUARANTEE OR PROTECTION**

None.

- **ELIGIBLE SUBSCRIBERS AND TYPICAL INVESTOR PROFILE**

All subscribers seeking to optimise their investments in fixed-income instruments.

Subscribers are strongly advised to diversify their investments sufficiently to avoid exposure solely to the risks of this SICAV.

Information on US investors:

The SICAV is not registered as an investment vehicle in the United States and its shares are not and will not be registered under the Securities Act of 1933 and, therefore, they may not be offered or sold in the United States to Restricted Persons, as defined hereafter.

A Restricted Person is (i) any person or entity located in the United States (including US residents), (ii) any corporation or any other entity subject to the laws of the United States or any state thereof, (iii) any US military personnel or any employee of a US government department or agency located outside the United States, or (iv) any other person that would be considered a US Person under Regulation S of the Securities Act of 1933, as amended.

FATCA:

Pursuant to the provisions of the Foreign Account Tax Compliance Act ("FATCA") applicable as of July 1st, 2014, if the SICAV invests directly or indirectly in US assets, the capital and income arising from such investments may be subject to withholding tax of 30%.

To avoid paying the 30% withholding tax, France and the United States have entered into an intergovernmental agreement under which non-US financial institutions ("foreign financial institutions") agree to institute procedures for identifying direct or indirect investors who qualify as US taxpayers and to provide certain information about these investors to the French tax authorities, which will disclose said information to the US tax authority, the Internal Revenue Service.

As a foreign financial institution, the SICAV undertakes to comply with the FATCA and to take all appropriate measures pursuant to the aforementioned intergovernmental agreement.

Recommended investment period: minimum five years.

2. CHANGES AFFECTING THE UCI

CHANGES WHICH TOOK PLACE DURING THE PERIOD OR ARE STILL TO TAKE PLACE

The Board of Directors meeting of December 18th, 2018 decided concerning **LAZARD CONVERTIBLE GLOBAL**:

1) Creation of 3 new shares:

Name	ISIN	Currency	Allocation of net income	Eligible investors	Minimum initial subscription	Initial NAV	Financial management fees
RD EUR	FR0013398914	EUR	Distribution	All subscribers	1 share	EUR 200	1,465%
RD USD	FR0013398930	USD	Distribution	All subscribers	1 share	USD 200	1,465%
RC USD	FR0013398922	USD	Accumulation	All subscribers	1 share	USD 200	1,465%

2) Change in share features, as follows:

	New wording	New allocation of distributable income	New minimum amount of initial subscription	Eligible investors
I share	IC EUR	Accumulation only	-	-
R share	RC EUR	Accumulation only	-	-
ID share	ID EUR	-	-	-
I USD share	IC USD	Accumulation only	-	-
R H-EUR share	RC H- EUR	Accumulation only	-	-
T	TC EUR	Accumulation only	Greater than or equal to € 1 000 000	See below*
TH-EUR share	-	Accumulation only	Greater than or equal to € 1 000 000	See below*

* **TC EUR and TH-EUR shares** – Authorised Investors and Minimum Subscription Amount:

- No minimum subscription amount for (i) UCIs managed by the management company or (ii) the management company in the context of proprietary investment;
- Without minimum subscription amount for investors whose financial intermediaries are subject to the MIFID II Directive or equivalent regulations within the framework of
 - o their independent advisory activity, or

- non-independent investment advice where they have concluded agreements with their clients stating that they may neither receive nor retain retrocessions, or
 - the provision of a portfolio management service on behalf of third parties;
- With a minimum initial subscription amount of €1 000 000 (1 million euros) for other investors.
- **Effective date: February 6th, 2019**

The Board of Directors meeting of December 18th, 2018 also decided concerning **LAZARD CONVERTIBLE GLOBAL**:

1) Creation of 7 new shares:

Name	ISIN	Currency	Allocation of net income	Eligible investors	Minimum initial subscription	NAV Initial	Financial management fees
TC GBP	FR0013414018	GBP	Accumulation	Authorised investors ***	Greater than or equal to GBP 1 000 000	GBP 200	0,815%
TD GBP	FR0013414026	GBP	Distribution	Authorised investors ***	Greater than or equal to GBP 1 000 000	GBP 200	0,815%
RC H-HKD	FR0013429420	HKD	Accumulation	All subscribers	HKD 10 000	HKD 2 000	1,52%
RC H-SGD	FR0013429438	SGD	Accumulation	All subscribers	SGD 1000	SGD 200	1,52%
IC H-USD	FR0013429446	USD	Accumulation	Professional clients *	1 share	USD 1000	0,915%
RC H-USD	FR0013429396	USD	Accumulation	All subscribers	USD 1000	USD 200	1,52%
RD H-USD	FR0013429412	USD	Distribution	All subscribers	USD 1000	USD 200	1,52%

2) Change in features of existing shares, as follows:

	Eligible investors	Minimum initial subscription
IC EUR share	Professional clients*	1 share
ID EUR share	Professional clients*	-
IC USD share	Professional clients*	-
IC H- EUR share	Professional clients*	-
ID H- EUR share	Professional clients*	-
IC H- CHF share	Professional clients*	-

*** IC EUR, ID EUR, IC USD, IC H-EUR, ID H-EUR, IC H-CHF and IC H-USD shares:**

Eligible investors: as from 01/07/2019 Professional customers within the meaning of Directive (EU) 2014/65/EU as amended by Directive (EU) 2016/1034 or any equivalent regulation outside the European Union.

**** TC EUR and TH-EUR share – Authorised Investors and Minimum Subscription Amount:**

- (i) Without minimum subscription amount (i) for UCIs managed by the Management Company or (ii) for the Management Company on its own account;
- (ii) Without minimum subscription amount for investors whose financial intermediaries are subject to the MIFID II Directive or equivalent regulations within the framework of
 - o their independent advisory activity, or
 - o non-independent investment advice where they have concluded agreements with their clients stating that they may neither receive nor retain retrocessions, or
 - o the provision of a portfolio management service on behalf of third parties;
- (iii) With a minimum initial subscription amount of €1 000 000 (1 million euros) for other investors.

***** TC GBP and TD GBP shares: Authorised investors**

- (i) Without minimum subscription amount (i) for UCIs managed by the Management Company or (ii) for the Management Company on its own account;
- (ii) Without minimum subscription amount for investors whose financial intermediaries are subject to the MIFID II Directive or equivalent regulations within the framework of
 - o their independent advisory activity, or
 - o non-independent investment advice where they have concluded agreements with their clients stating that they may neither receive nor retain retrocessions, or
 - o the provision of a portfolio management service on behalf of third parties;
- (iii) With a minimum initial subscription amount of GBP 1 000 000 (1 million pounds sterling) for other investors.
- (ii) Professional customers within the meaning of Directive (EU) 2014/65/EU or any equivalent regulation in third countries.

III. Agreements covered by Article L225-37-4 para.2 of the French Commercial Code

The SICAV was not informed of the conclusion of any agreements covered by Article L.225-37-4 para.2 of the French Commercial Code during the financial year ended October 31st, 2019.

IV. Table of currently-valid delegations of powers granted by the shareholders' meeting, as stipulated in Article L225-37-4 para.3 of the French Commercial Code

No delegations of power covered by Article L.225-37-4 para.3 of the French Commercial Code were granted or were ongoing during the financial year ended October 31st, 2019.

V. Method of operation of executive management

The Board of Directors decided to separate the functions of Chairman of the Board of Directors from that of Chief Executive Officer.

3. MANAGEMENT REPORT

PERFORMANCE

Group of unhedged EUR units:

- The performance of Lazard Convertible Europe IC EUR units is: **8,87%**.
- The performance of Lazard Convertible Global RC EUR units is: **8,17%**.
- The performance of Lazard Convertible Global TC EUR units is: **8,87%**.
- The performance of Lazard Convertible Global K units is: **8,87%**.
- The performance of Lazard Convertible Global ID units is: **8,88%** (of which 2,12% of dividends relating to the allocation of distributable sums detached on 19/02/19).
- The performance of Lazard Convertible Global RD EUR units created on 06/02/19 is: **5,64%**.

The benchmark's performance (Thomson Global Focus Conv EUR) over the period was: 7,93%.

Group of hedged EUR units:

- The performance of Lazard Convertible Global IC H EUR units is: **4,66%**.
- The performance of Lazard Convertible Global R H EUR units is: **3,98%**.
- The performance of Lazard Convertible Global ID H EUR units is: **4,66%** (of which 1,98% of dividends relating to the allocation of distributable sums detached on 19/02/19).
- The performance of Lazard Convertible Global TH units is: **4,66%**.

The benchmark's performance (Thomson Global Focus Conv Hedged EUR) over the period was: 3,92%.

Unhedged USD units:

- The performance of Lazard Convertible Global IC USD units is: **7,20%**.
- The performance of Lazard Convertible Global RD USD units created on 06/02/19 is: **3,51%**.
- The performance of Lazard Convertible Global RC USD units created on 06/02/19 is: **3,61%**.

The benchmark's performance (Thomson Global Focus Conv USD) over the period was: 6,28%.

Hedged USD units:

- The performance of Lazard Convertible Global IC H USD units created on 05/07/19 is: **-2,22%**.
- The performance of Lazard Convertible Global RC H USD units created on 05/07/19 is: **-2,44%**.
- The performance of Lazard Convertible Global RD H USD units created on 05/07/19 is: **-2,44%**.

The benchmark's performance (Thomson Global Focus Conv Hedged USD) over the period was: 0,62%.

Hedged HKD units:

- The performance of Lazard Convertible Global RC H HKD units created on 05/07/19 is: **-2,51%**.

The benchmark's performance (Thomson Global Focus Conv Hedged HKD) over the period was: 0,26%.

Hedged SGD units:

- The performance of Lazard Convertible Global RC H SGD units created on 05/07/19 is: **-2,77%**.

The benchmark's performance (Thomson Global Focus Conv Hedged SGD) over the period was: 0,22%.

Performances vary over time and past performance is no guarantee of the UCI's future results.

Hedged CHF units:

- The performance of Lazard Convertible Global IC H CHF units is: **4,24%**.

The benchmark's performance (Thomson Global Focus Conv Hedged CHF) over the period was: 3,58%.

Unhedged GBP units:

- The performance of Lazard Convertible Global TC GBP units created on 05/07/19 is: **-5,66%**.
- The performance of Lazard Convertible Global TD GBP units created on 05/07/19 is: **-6,08%**.

The benchmark's performance (Thomson Global Focus Conv GBP) over the period was: -3,26%

Performances vary over time and past performance is no guarantee of the UCI's future results.

ECONOMIC ENVIRONMENT

Introduction

The past year was marked by a slowdown in global growth, in both developed and emerging countries, and especially in the manufacturing sector in which confidence declined. Several factors weighed on the markets, notably the rise in US-China trade tensions, problems specific to the automotive sector and political uncertainties in Europe. The slowdown in the manufacturing sector has not yet contaminated the services sector, which has held up well until now thanks to the fact that consumption remains upbeat. In the face of increasing downside risks, central banks have chosen to ease monetary policy as a preventive measure. After adopting the principle of a pause in its rate-hiking cycle, the Federal Reserve (Fed) cut its interest rates twice and stopped reducing its balance sheet. The European Central Bank (ECB) postponed a possible rise in its interest rates and launched a new wave of targeted longer term loans (TLTRO), before announcing a new package of measures including, among other things, a cut in the deposit rate and a resumption of asset purchases. In emerging countries, the Central Bank of China (PBOC) cut the reserve requirement ratio for the banking sector on three occasions while several other countries cut interest rates. Against this backdrop, the equity markets experienced renewed volatility and bond yields fell more or less worldwide.

GDP volume growth (%)	2017	2018	2019	2020
World	3,8	3,6	3,0	3,4
Developed countries	2,5	2,3	1,7	1,7
Emerging countries	4,8	4,5	3,9	4,6
Eurozone	2,5	1,9	1,2	1,4
United States	2,4	2,9	2,4	2,1

IMF Economic Outlook, October 2019

* The data and forecasts for India are presented based on the budget year

The MSCI World index of global equity markets in dollars fell by 0,7% year-on-year, due to a fall of 0,2% in developed countries and of 4,5% in emerging countries. In their respective currencies, the S&P 500 gained 2,2%, the Euro Stoxx gained 1,6% and the Topix lost 12,6%. The performances of the S&P 500 and the Topix were more beneficial for investors not hedged against foreign exchange risk (+8,8% and -2,4% respectively), with the dollar and the yen appreciating against the euro.

The euro fell from €1,16 to €1,09 year-on-year, i.e. a depreciation of 6,1%. It depreciated by 10,7% against the yen, by 4,6% against the Swiss franc and by 0,4% against sterling. Political uncertainties in Italy and the ECB's accommodative monetary policy weighed on the single currency. At the same time, the yen and the Swiss franc benefited from their safe-haven status during the various episodes of flight to quality.

The slight fall in the MSCI World index masked a bumpy trajectory, mainly due to the back-and-forth China-US trade tensions, concerns about global growth and political uncertainties in Europe. Faced with these international uncertainties, the Fed and the ECB switched to a more accommodative approach, as a precaution, which boosted the equity markets.

Against this backdrop, yields on government bonds fell in the United States and Germany. Year-on-year, the US 10-year interest rate fell from 3,06% to 1,66%, having peaked at 3,24% in November 2018. In parallel, the German 10-year interest rate fell from +0,47% to -0,57%, after peaking at +0,57% in early October 2018.

Falling interest rates across the world pushed the weighting of negative yield bonds in the Bloomberg Barclays Global Aggregate index up from 13% to 26% between September 2018 and September 2019.

Credit spreads on 10-year maturities between peripheral countries and Germany tightened over the past year: by 180 basis points in Greece, 128 basis points in Italy, 68 basis points in Portugal and 31 basis points in Spain.

Credit margins on corporate bonds remained virtually stable year-on-year. According to the ICE Bank of America Merrill Lynch indices, they rose from 110 to 111 for good quality corporate bonds and from 355 to 366 for high yield bonds.

The price of a barrel of Brent fell by 28% year-on-year, from \$83 to \$60, due in particular to fears around global demand. In mid-September 2019, the attack on two oil facilities in Saudi Arabia triggered an increase of around \$12 in the barrel price over a single day. But the movement was short-lived.

United States

Growth remained solid in the US, reaching +1,1% in Q4 2018, +3,1% in Q1 2019 and +2,0% in Q2 2019, on an annualised basis. GDP grew by +2,3% year-on-year.

The ISM surveys showed a downturn, with the manufacturing ISM falling from 59,5 to 47,8 and the non-manufacturing ISM falling from 60,8 to 52,6.

Household consumption grew at a good pace, apart from two soft patches in December 2018 and February 2019, showing a year-on-year increase of +2,3%.

Job creation has slowed in recent months, but has not taken a downturn. In year-on-year terms, 2 000 000 jobs were created by the private sector. The unemployment rate fell by 0,3 points to 3,5%, its lowest level since December 1969. The hourly wage accelerated gradually to reach a peak of +3,4% year-on-year in February 2019. It then moderated to +2,9% year-on-year.

Residential investment contracted by 3,2% year-on-year in Q2 2019. Real estate prices continued to slow gradually, reaching +3,2% year-on-year at the national level, according to the S&P CoreLogic Case-Shiller index. The NAHB home builder confidence index was virtually stable year-on-year, masking a decline at the end of Q4 2018. Non-residential investment has slowed in recent quarters but remains up +2,6% year-on-year. The US trade deficit fluctuated around \$55 billion per month. Exports rose by 0,1% year-on-year while imports remained stable. Imports from China fell by 14,0% year-on-year.

Headline inflation slowed from +2,0% to +1,4% year-on-year, while core inflation accelerated from +2,2% to +2,4% year-on-year.

The Federal Reserve raised its benchmark interest rate by 25 basis points on December 19th, 2018, bringing it to a band of 2,25%-2,50%. On January 4th, 2019, Jerome Powell indicated that the Federal Reserve would be patient and adjust its monetary policy in line with economic results. On March 20th, 2019, the Fed announced that it would stop reducing its balance sheet from September 2019. On June 19th, 2019, the Fed removed the reference to patience from its press release to indicate that it was ready to act. It made two 25 basis-point cuts in its benchmark rate on July 31st and September 19th, bringing it to a band of 1,75%-2,00%.

The mid-term elections on November 6th, 2018 resulted in a divided Congress. The Democrats took control of the House of Representatives, securing 235 of the 435 seats. With 53 of the 100 seats in the upper house, the Republicans held onto their majority in the Senate. Due to a lack of financing, the federal administrations were partially closed from December 23rd, 2018 to January 25th, 2019, the longest shutdown in the history of the United States.

Eurozone

Growth in the Eurozone slowed to an annualised rate of +0,8% in Q2 2019 after +1,7% in Q1 2019 and +1,2% in Q4 2018. GDP grew by +1,2% year-on-year in the Eurozone, by +0,4% in Germany, by +1,4% in France, by +2,0% in Spain and by +0,1% in Italy.

The Eurozone composite PMI fell from 54,1 to 50,1, mainly due to the fall in the manufacturing PMI from 53,2 to 45,7, in particular the decline from 53,7 to 41,7 in Germany. The Eurozone services PMI fared better, falling from 54,7 to 51,6.

Car sales in the Eurozone have gradually normalised after the impact of the entry into force of the WLTP anti-pollution standards on September 1st, 2018. Automotive production, however, has continued to slow, falling by 2,4% year-on-year.

Unemployment in the Eurozone continued to fall, reaching a new record low of 7,4% since 2008, versus 8,0% a year earlier.

Headline inflation slowed from +2,1% to +0,9% year-on-year. Core inflation moved within a tight range of +0,8% and +1,3% year-on-year.

At its meeting on December 13th, 2018, the ECB confirmed the end of its purchase programme, specifying that it would continue to reinvest redemptions from maturing securities for an extended period after beginning to raise interest rates. On March 7th, 2019, the ECB announced that it would keep interest rates unchanged “at least until the end of 2019” and launch a new wave of targeted longer-term refinancing operations (TLTROs) for Eurozone banks. On June 6th, 2019, the ECB postponed a possible rate hike to the second half of 2020. On September 13th, 2019, Mario Draghi announced a new package of monetary easing measures, including: a 10-basis point cut in the deposit rate to -0,50%; a partial exemption mechanism for certain banks; the resumption of QE to the tune of €20 billion per month, with no time limit; more favourable conditions for TLTRO 3 and a strengthening of the forward guidance, which now links interest rate trends to inflation.

The European elections in May 2019 saw support for the traditional parties erode but the surge in support for the populist bloc that some had anticipated did not take place. The numbers among liberals and environmentalists showed an increase.

In Italy, the Five Star Movement and the Democratic Party formed a new government after the collapse of the coalition between the Five Star Movement and the League.

In Spain, after the failure of its draft budget, the new head of the socialist government, Pedro Sanchez, called early general elections for April 28th, 2019, which saw the PSOE take the lead but without giving it a majority. As the various parties failed to agree to form a government, new legislative elections were called for November 10th, 2019.

Japan

Growth in Japan increased from an annualised rate of +1,8% in Q4 2018 to +2,2% in Q1 2019 and +1,3% in Q2 2019. GDP grew by +1,0% year-on-year.

The manufacturing PMI fell from 52,5 to 48,9 while the services PMI rose from 50,2 to 52,8.

The labour market remained tight. The unemployment rate fell from 2,4% to 2,2% and the ratio between job offers and job applications stabilised at 1,6.

Inflation over one year slowed from +1,2% to +0,3% and underlying inflation inched up to +0,6% year-on-year, compared with +0,4% twelve months earlier.

China

Year-on-year growth in China slowed from 6,4% in Q4 2018 and Q1 2019 to 6,2% in Q2 2019. In March 2019, the government announced a growth target of between 6,0% and 6,5%.

The Caixin manufacturing PMI deteriorated at first to a low of 48,3 in January 2019. It subsequently picked up to 51,4 in September 2019 versus 50,0 in September 2018.

Industrial production slowed from +5,8% to +4,4% year-on-year while investment in the manufacturing sector slowed from +16,1% to -1,6% year-on-year. Car sales also slowed, falling by 7,7% year-on-year. Expenditure on infrastructure and real estate grew more or less at the same rate as the previous year.

Exports slowed from +13,9% to -3,2% year-on-year and imports slowed from +14,3% to -8,5% year-on-year. Exports to the US fell.

Growth in the total credit stock accelerated slightly, from +10,6% to +11,0% year-on-year.

The central bank reduced the level of compulsory bank reserves by 100 basis points in October 2018, by 100 basis points in January 2019 and by 50 basis points in September 2019, bringing it to 13,0%. The central bank also announced reform of the mechanism for setting preferential lending rates, with which bank lending rates are aligned.

In particular, the government announced tax cuts for households and companies, amounting to around 2% of GDP in 2019, as well as measures to support investment in infrastructure and the automotive sector.

MANAGEMENT POLICY

During this financial year, the fund's I unit outperformed its benchmark index (+8,87% versus +7,93% for the benchmark index). Overall, our stock selection had a positive impact over the period, especially in cyclical consumption, industry and technology. Our overexposure to the US equity markets made a positive contribution to relative performance. As the Chinese equity market significantly outperformed other global equity markets over the period, our underweight exposure to the region proved costly in relative terms. US and European interest rates eased significantly over the period. Our shorter duration than the index over the majority of the period had a negative impact in relative terms. We increased our duration above the benchmark at the end of the period, which partly offset this impact. Currency exposure had a slightly positive impact on the relative performance: the euro depreciated against the dollar, the Swiss franc and most Asian currencies.

See monthly comments below.

November 2018

In November 2018, the Lazard Convertible Global SICAV generated a performance of +0,18% against +0,50% for its benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure decreased to 48,3%, while that of its benchmark rose to 41,5%. The fund's modified duration was unchanged, remaining lower than that of the benchmark at 1,20 versus 2,22. Our equity exposure had a neutral impact in relative terms over the period, with the impact of positive performance in the US dampened by European underperformance. Our modified duration, lower than that of the benchmark, had a slightly negative impact over the period, 5-year swap rates having eased in the United States and Europe. The best contributions in relative terms during the month came from non-cyclical consumption and technology, while cyclical consumption and real estate proved costly. We set up two new positions during the month, Wright Medical Group 2023 in orthopaedic prosthetics and BASF 2023 in chemicals. We trimmed our position in Unicharm 2020 so as to reduce the liquidity risk following a large number of conversions on the issue. During the month, we remained overexposed to the dollar and euro versus all other currencies.

December 2018

In December 2018, the Lazard Convertible Global SICAV recorded a performance of -3,48% against -2,76% for its benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure decreased to 43,3%, while that of its benchmark index fell to 38,2%. The fund's modified duration increased slightly while remaining lower than that of the benchmark, at 1,34 versus 2,40. Our equity exposure had a negative impact in relative terms over the period. As all global markets turned around, the positive effect of the underexposure to Asia and Japan was offset by the underperformance of US and European equity markets. Our modified duration, lower than that of the benchmark, had a negative impact over the period, 5-year swap rates having eased in the United States and Europe. The best contributions in relative terms during the month came from communications and energy, while technology and non-cyclical consumption proved costly. We sold WENDEL 2019 as well as BIM/ELIOR 2020, taking part in the tender offer for the stock this month. We set up a new position in ELIS 2023 in industrial laundry. During the month, we remained overexposed to the dollar and euro versus all other currencies.

January 2019

In January 2019, the Lazard Convertible Global SICAV generated a performance of +4.05% compared with +3.69% for its benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure increased to 51.8%, while that of its benchmark rose to 44.3%. Modified duration remained stable, still lower than that of the benchmark, at 1.33 versus 2.12. Our overexposure to US and European equities had a positive impact in relative terms over the period. Our modified duration, lower than that of the benchmark, made a marginal contribution, 5-year swap rates having eased in the United States and Europe. The best contributions in relative terms during the month came from technology and cyclical consumption, while energy and basic materials proved costly. We sold Fresenius 2019 and bought Fresenius 2024 (switch), we also sold 51Job 2019, Ceconomy 2020, Unibail 2021, IAG 2022, Tesla 2019 and Illumina 2019 in order to add to Tesla 2021, Illumina 2023 and Palo Alto Networks 2023. We also set up a new position in LG Chem 2021 in petrochemicals. During the month, we remained overexposed to the dollar and euro versus all other currencies.

February 2019

In February 2019, the Lazard Convertible Global SICAV achieved a performance of +3.56% against +2.66% for its benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure increased to 53.7%, while that of its benchmark rose to 45.5%. Modified duration decreased, remaining lower than that of the benchmark, at 1.02 versus 2.04. Our overexposure to US equities, particularly technology, had a positive impact in relative terms, while our underexposure to Asian and Japanese equities had a slightly negative relative impact over the period. Our modified duration, lower than that of the benchmark, made a marginal contribution, 5-year swap rates having tightened slightly in the United States and Europe. The best contributions in relative terms during the month came from non-cyclical consumption and technology, notably semiconductors, while industry, particularly aeronautics, proved costly. We sold Citrix 2019, Twitter 2019, Suez 2020, AMS 2022 and Micron 2043 during the month. We set up five new positions: Fortive 2022, Dexcom 2023, Docusign 2023, Etsy 2023 and Wix 2023. During the month, we remained overexposed to the dollar and euro versus all other currencies.

March 2019

In March 2019, the Lazard Convertible Global SICAV generated a performance of +1.52% against +1.30% for its benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure decreased slightly to 52.2%, while that of its benchmark fell to 44.7%. Modified duration rose while remaining lower than that of the benchmark at 1.12 versus 2.06. Our overexposure to US equities had a positive impact in relative terms, while our underexposure to China had a negative impact in relative terms over the period. Our modified duration, lower than that of the benchmark, had a negative impact in relative terms, 5-year swap rates having eased in the United States and Europe during the month. The best contributions in relative terms during the month came from telecommunications and technology, while the underexposure to Chinese real estate proved costly. Stock picks made a positive contribution over the month, with the five best-performing stocks not included in the index, in particular Inmarsat, which received a takeover offer from a consortium of several private equity funds. During the month, we increased our position in Etsy 2023 and set up a new position in MercadoLibre 2028 in e-commerce. We remained overexposed to the dollar and euro versus all other currencies.

April 2019

In April 2019, the Lazard Convertible Global SICAV generated a performance of +2.85% against +1.50% for its benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure increased to 53.5%, while that of its benchmark rose to 45.6%. Modified duration decreased slightly, remaining lower than that of the benchmark at 1.04 versus 2.03. Our overexposure to US and European equities had a positive impact in relative terms. The underexposure to Asia proved costly but was offset by good stock picks in the region. Our modified duration, lower than that of the benchmark, made a marginally positive contribution in relative terms, 5-year swap rates having tightened slightly in the United States and Europe during the month. The best contributions in relative terms during the month came from communications and cyclical consumption, while industry proved costly in relative terms. Stock picks made a positive contribution during the month: of our five top contributors, four are not included in the index. Over the month, we sold Inmarsat 2023 and set up four new positions: Hubspot 2022 in marketing software development, Okta 2023 in cloud software, LEG Immo 2025 in real estate and Sika 2025 in industry. We remained overexposed to the dollar and euro versus all other currencies.

May 2019

In May 2019, the Lazard Convertible Global SICAV generated a performance of -2.14% against -2.36% for its

benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure decreased to 49,1%, while that of its benchmark index fell to 38,8%. Modified duration rose slightly while remaining lower than that of the benchmark at 1,24 versus 2,22. Stock picks made a positive contribution over the month, accounting for most of the outperformance. Of our ten best-performing stocks, seven are not included in the index. Stock picks in the United States were particularly beneficial: despite our overexposure to the technology sector, which turned around during the month, our picks in software and services and our underexposure to semiconductors made the technology sector the best contributor to performance over the month in relative terms. Our picks in the US non-cyclical consumption sector and underexposure to Asia also had a positive impact, while our European exposure was costly in relative terms, negatively affected by our holdings in the cyclical consumption sector. Our modified duration, lower than that of the benchmark, had a negative impact in relative terms, 5-year swap rates having eased in the United States and Europe during the month. Over the month, we sold Unicharm 2020, Salzgitter 2022 and switched from IAC 2022 to IAC 2026. We increased our positions in Ctrip 2022, ServiceNow 2022 and ETSY 2023. We remained overexposed to the dollar and euro versus all other currencies.

June 2019

In June 2019, Lazard Convertible Global achieved a return of +1,74% compared with +0,97% for its benchmark index, the Thomson Reuters Global Focus Convertible index in euros. The fund's equity exposure increased to 50,6%, while that of its benchmark rose to 41,9%. Modified duration rose while remaining lower than that of the benchmark at 1,48 versus 2,11. Stock picks had a positive impact in relative terms: our picks in the US biotech and European luxury goods sectors made a significantly positive contribution over the month. We also benefited from a takeover bid for Cypress Semiconductor by Infineon; the stock is not included in the index. In Asia, our stock picks also had a positive impact in relative terms: of our five best-performing Asian stocks, four are not included in the index. Our underexposure to basic materials and industry had a negative impact in relative terms over the period. Our modified duration, lower than that of the benchmark, had a negative impact in relative terms, 5-year swap rates having eased in the United States and Europe. We decided to increase the fund's duration slightly versus that of the index this month. Over the month, we sold Cypress 2023 and switched from Ctrip 2022 to Ctrip 2025. We set up a new position in Baozun 2024, a Chinese e-commerce services company. We increased our positions in Okta 2023, Hubspot 2022, Docusign 2023, Weibo 2022, 3Sbio 2022 and BASF 2023. We remained overexposed to the dollar and euro versus all other currencies.

July 2019

In July 2019, Lazard Convertible Global achieved a return of +3,37% compared with +2,65% for its benchmark index, the Thomson Reuters Global Focus Convertible index in euros. The fund's equity exposure decreased to 49,4%, while that of its benchmark index fell to 41,3%. Modified duration increased to slightly above that of the benchmark, at 2,41 versus 2,18. Stock picks had a positive impact in relative terms: our picks in the US e-commerce and software sectors made a significantly positive contribution over the month. In Europe, our stocks in the aerospace and video game sectors also made a positive contribution in relative terms. Our underexposure to Asia proved costly in relative terms, although our stock picks had a positive impact: of our six best stocks, four are not included in the index. Our picks in non-cyclical consumption and our underexposure to basic materials had a negative impact in relative terms over the period. Our modified duration, now in line with that of the index, has a slightly positive impact in absolute terms, as the 5-year swap rate eased in Europe. We sold our position in Baozun and added to our exposure to telecommunications (notably Telecom Italia) and technology (in particular the video games and software sub-sectors). During the month, we remained slightly overexposed to the dollar versus all other currencies.

August 2019

In August 2019, the Lazard Convertible Global SICAV generated a performance of -0,23% against -0,38% for its benchmark index, the Thomson Reuters Global Focus Convertible in euro. The fund's equity exposure decreased to 46,5%, while that of its benchmark index fell to 38,4%. We increased the modified duration relative to the benchmark index, to 2,61 versus 2,24. In the United States, underexposure to the semiconductors sector had a positive impact in relative terms while e-commerce stocks had a negative impact over the period. In Europe, our energy and aerospace stocks had a positive impact on performance, partially offset by our discretionary consumption holdings. Our underexposure to Asia proved costly in relative terms, particularly in the discretionary consumption and utilities sectors. Our modified duration, now higher than that of the index, had a positive impact in absolute and relative terms, 5-year swap rates having eased in the United States and Europe. Over the month, we increased our exposure to basic materials (particularly the construction sub-sector) and energy (Total, amongst others). We also increased our exposure to technology, particularly in cloud computing and software publishers. During the month, we remained overexposed to the dollar versus all other currencies.

September 2019

In September 2019, Lazard Convertible Global achieved a return of -1,26% compared with 0,76% for its benchmark index, the Thomson Reuters Global Focus Convertible index in euros. The fund's equity exposure dropped to 44,7%, while that of its benchmark rose to 41,7%. Modified duration was higher than that of the benchmark at 3,08 against 2,28. Over the month, we observe a marked rotation from the convertible bonds that had posted the best performances since the beginning of the year to those that were lagging behind, and an underperformance of growth stocks, which are well represented in the convertible universe. With many of the year's strong performers held in the portfolio, this rotation had a particular impact on the fund's performance over the month. In addition, our underexposure to semiconductors in the United States and Europe proved costly in relative terms, although we reduced the underexposure during the month. In Asia, underexposure to real estate was detrimental, while our healthcare picks paid off. After having generated a strong performance in August, our modified duration, higher than that of the index, had a slightly negative impact in September as 5-year swap rates tightened in the United States and Europe. Over the month, we strengthened the Fund's convexity by replacing the former Ubisoft, MTU, Okta, Etsy and Tesla convertible bonds with more recent issues. We also reduced our strong overexposure to cloud computing in favour of online retail (Etsy, Wayfair) and industry in Europe (Dassault Aviation, Safran), enabling us to stabilise the portfolio. During the month, we remained overexposed to the dollar and added slightly to the Swiss franc.

October 2019

In October 2019, Lazard Convertible Global achieved a return of -1,30% compared with -0,66% for its benchmark index, the Thomson Reuters Global Focus Convertible index in euros. The fund's equity exposure remained stable at 45,0%, while that of its benchmark rose slightly to 43,4%. Modified duration was higher than that of the benchmark at 2,96 against 2,21. The rotation observed in September, targeting the convertible bonds that had performed best since the beginning of the year in favour of those lagging behind, continued in October. With many of the year's strong performers held in the portfolio, this rotation had a particular impact on the fund's performance over the period. On the other hand, our stock picks in the e-commerce sector and our overexposure to software in the United States were detrimental in relative terms, although we reduced the overexposure during the month. Our overexposure to the European luxury sector had a positive impact in relative terms. Our stock picks in Asia also has a positive impact in relative terms. Our modified duration, higher than that of the benchmark index, had a neutral impact in October.

We managed the portfolio actively to mitigate the impact of the rotation in September and October. Over the month, we stabilised the portfolio by selling some of our stocks with high equity exposure (Atlassian and Hubspot, amongst others) in favour of more convex stocks (Country Garden, Cellnex). We also reduced our overexposure to cloud computing and increased our exposure to industry in Europe. We remain confident in the portfolio's ability to rebound and believe we are close to the end of this rotation as we move through the quarterly earnings reporting season.

During the month, we remained overexposed to the dollar and Swiss franc versus all other currencies.

Past performance is no guarantee of future results.

4. REGULATORY INFORMATION

- **PROCEDURE FOR SELECTING AND ASSESSING INTERMEDIARIES AND COUNTERPARTIES**

The brokers used by the management company are selected on the basis of various evaluation criteria, covering research, quality of order execution and processing and the range of services offered. The management company's "Broker Committee" validates any updates to the list of authorised brokers. Each investment division (fixed income and equities) reports to the Broker Committee at least twice a year on the evaluation of the services provided by the various brokers and the breakdown of the volume of transactions handled.

- **BROKERAGE FEES**

Information on brokerage fees is available on the website: www.lazardfreresgestion.fr.

- **EXERCISING VOTING RIGHTS**

The scope and procedures for Lazard Frères Gestion SAS' exercise of the voting rights attached to the securities held in the UCIs managed by it are set out in the guidelines it has drawn up on its voting policy. This document can be consulted on the management company's website: www.lazardfreresgestion.fr.

- **COMMUNICATION OF ENVIRONMENTAL, SOCIAL AND GOVERNANCE CRITERIA**

Lazard Frères Gestion firmly believes that the integration of environmental, social and governance (ESG) criteria in the management of assets provides an additional guarantee in terms of a durable economic performance.

In fact, the long-term performance of investments is not limited solely to adherence to the financial strategy, but must also take the company's interactions with its social, economic and financial environment into account.

The incorporation of ESG criteria therefore is a natural component of our investment process.

Our overall approach can be summarised as follows:

- ✓ Rigorous financial analysis of the company covering the quality of assets, financial soundness, projected cash flows and their reinvestment by the company, the strength of economic profits, profit durability, and quality of management.
- ✓ This durability is strengthened by incorporating extra-financial criteria:
 - Social criteria: through the development of human capital.
 - Environmental criteria: through the prevention of all environmental risks.
 - Governance criteria: by respecting the balance between the managerial and shareholder structures so as to prevent potential conflicts of interest and safeguard the interests of minority shareholders.

The intensity and methods by which we incorporate ESG criteria may vary depending on the asset class and investment process involved, but the common objective is to ensure better apprehension of ESG risks that are likely to have a strong impact on the value of a company or sovereign asset.

Information on ESG criteria is available on the website www.lazardfreresgestion.fr.

- **CARBON LAW**

ESG criteria incorporated for the Lazard Convertible Global SICAV

- Analysis of governance

The quality of governance has always been a decisive element in our investment policy.

Satisfactory governance guarantees transparency and a balance of power, with a right to input by the shareholders.

Lazard Frères Gestion believes that best practices in terms of corporate governance are a risk control factor that favour the creation of value and contribute to a broad alignment of the interests of all stakeholders.

- Social criteria

Social criteria include the prevention of accidents, staff training, respect for employee rights, human rights, ethics in the supply chain, and social dialogue.

Human capital is one of the two drivers of a company alongside financial capital, which if neglected could give rise to risks around the loss of operational profitability or an increase in costs linked to payroll volatility.

- Environmental criteria

Environmental criteria take into account the direct or indirect impact of the company's activity on the environment (waste management, energy consumption and emission of pollutants) and are assessed by looking at the relevant activity sector.

We seek to understand how the company appraises environmental risks and any negligence on its part could potentially lead to liabilities that impact its economic profitability.

If environmental risks (pollution, biodiversity, resources and local communities) are not adequately appraised, this can lead to a loss of profitability, reputational risk and financial risk.

Information used to analyse ESG criteria

The analysis of ESG factors is carried out by the four convertible analysts/fund managers, with one analyst/fund manager based in Paris at Lazard Frères Gestion and three in New York at Lazard Asset Management.

This dual location of convertible bond management in Paris and New York enables us to benefit from the combined research and analysis resources of Lazard Frères Gestion and Lazard Asset Management and is an asset in the analysis of global convertible bonds.

The analysts/fund managers therefore use several sources of information: the extra-financial research produced by Vigeo-Eiris – a partner of Lazard Frères Gestion – and by MSCI and Trucost – partners of Lazard Asset Management – as well as companies' **Corporate**¹ Social Responsibility reports, direct exchanges with companies and brokers, and publicly available information.

ESG analysis methodology and results

- ESG analysis methods

The extra-financial analysis is carried out by the analysts/fund managers and is built into the investment themes.

The six criteria analysed are Human Resources, Corporate Governance, Human Rights, Environment, Supply Chain, Community. Each criterion is subject to a qualitative analysis by the analysts/fund managers, which they then complete with a Vigeo score.

Each issuer is rated by Vigeo-Eiris in relation to its sector (score ranging from -2 to +2), with an absolute score (from 0 to 100) for each of the criteria. The companies with the lowest absolute scores (overall "Weak" score) are the subject of a specific commentary each quarter written by the ESG team, based on qualitative information from Vigeo-Eiris, which is sent to the management team.

In addition to this research from Vigeo-Eiris, the analysts/fund managers use various sources of information to support their opinion on the extra-financial qualities of companies, in particular the extra-financial research provided by MSCI and Trucost.

For example, Lazard Asset Management's Global Risk team produces a quarterly report containing ESG ratings. These ratings, which cover more than 8 000 companies, are provided by two external providers, Trucost and MSCI ESG Research. Companies with the lowest environmental or corporate governance ratings are "flagged" and placed on a watch list.

As is the case for all of Lazard Asset Management's management strategies, these lists are tools used by the convertible bond management team to help them identify potential ESG issues of companies or issuers in their

¹ NdT : coquille dans la VF, "Coporate" au lieu de "Corporate"

investment universe.

This information is particularly important for issuers that are not monitored by Vigeo-Eiris or not monitored accurately enough.

The analysis of criteria relating to climate risks has thus far been delegated essentially to our partner Vigeo-Eiris.

Vigeo analyses the manner in which issuers take physical risks and transition risks into account in their development model, based on the Environment criterion, and using the following approach:

- Assessment of physical risks

An assessment of the level of control of these risks by the issuers, and an examination of:

- Whether companies have identified and quantified the physical climate risks to which they may be exposed
- Measures taken to prevent, adapt and mitigate these risks
- Indicators reflecting the results of these efforts to anticipate and mitigate the consequences that the physical impacts of climate change could have on their activities
 - o Impacts on company assets (damage, destruction of buildings or production equipment, early retirement of existing assets, etc.)
 - o Supply chain impacts (reduced availability/increased costs of raw materials, components or equipment, etc.)
 - o Cost impacts (insurance costs, investment costs, operating costs, etc.)
 - o Impacts on the company's ability to carry out its activities and operations (reduction or disruption of production capacity, impacts on the management and planning of the workforce, etc.)

- Assessment of transition risks Three transition risks are identified:

- o The risk associated with changes in energy prices
The commitments of issuers to reduce their energy consumption and associated emissions are measured, or how companies change their energy mix.
 - o The risk associated with advances in technology
These risks correspond to companies' exposure to obsolescence risks due to lack of technological innovation, and substitution of existing products and services by others with lower emissions.
This is followed by the efforts made by companies to develop and market products and services with a reduced climate impact, and their implications in R&D activities for ecological products and services.
 - o Risk associated with regulatory changes
This entails measuring how companies anticipate regulatory changes:
 - Carbon footprint/carbon price: a measurement of the carbon footprint makes it possible to assess the sectors and companies that emit the most greenhouse gases and are therefore the most exposed to climate regulations
 - Stranded asset/impairment risk: identification of issuers whose revenues derive from fossil energies and those with fossil fuel reserves to identify those most exposed to the risk of depreciation of their assets
 - Compliance with 2-degree scenario targets: a measure of the level of commitment of issuers to the energy transition of their economic model. Assessment of commitments made and efficiency of the measures taken to reduce their GHG emissions, change their energy mix and reduce their energy consumption
- How ESG criteria are taken into account in the investment decision-making process

For each company analysed, the management team's conclusions on each of the ESG criteria are clearly expressed.

This analysis of ESG qualities for each issuer is incorporated into bond selection to ensure that the investment is appropriate in terms of the credit risk and the potential of the underlying stock.

- Monitoring of ESG indicators

➤ Carbon footprint

In the context of Article 173 of the law of August 17th, 2015, LAZARD Frères Gestion made a decision to report Lazard Convertible Global's carbon footprint.

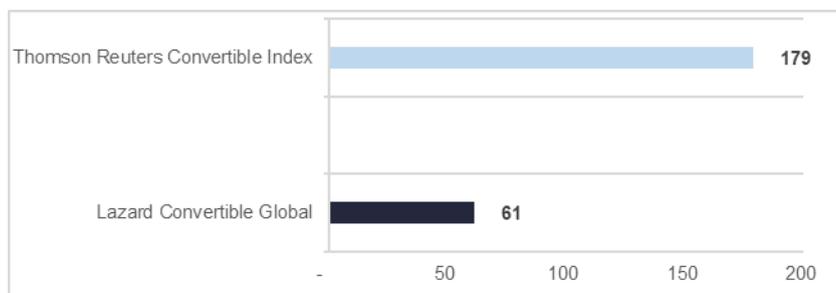

- To obtain the data needed to calculate the carbon footprint, we decided to establish a partnership with TRUCOST in 2016.
- LAZARD Frères Gestion use the carbon intensity indicator, which is expressed in CO2 equivalent tonnes per million euros of income.
- The carbon footprint assessment takes into account scope 1 and 2 greenhouse gas (GHG) emissions.
 - Scope 1: All direct emissions linked to the use of fossil fuels to manufacture a product.
 - Scope 2: Direct emissions linked to the production of energy (electricity, etc.) that is consumed by the company.
- Measurement is solely conducted on securities that are directly owned. Listed companies for which we do not have carbon-related data are removed from the scope of analysis and the weight of each security in the portfolio is then rebased to obtain a total weighting of 100%.
- The CO₂ emissions are divided proportionally based on the delta between the issuer and the underlying share.
- The method used to calculate the portfolio's carbon intensity is the weighted average GHG emissions divided by the income of each position. We thus get the following formula:

$$\text{Intensité carbone d'un portefeuille} = \sum \left[\left(\frac{\text{Émissions (scope 1 + 2)}}{\text{Chiffre d'Affaires}} \right) \text{ de chaque titre} \times \text{poids de chaque titre} \right]$$

Portfolio's carbon intensity score

$\frac{\text{Emissions (scope 1 + 2) of each security} \times \text{weighting of each security}}{\text{Revenue}}$

Emissions in millions of euros of income (tonnes of CO2 eq./€m of income)

Date: 30/09/2019

Fund coverage ratio: 99% Index

coverage ratio: 99%

➤ Contribution to energy transition indicator

We apply an energy transition score to measure the company's level of engagement in the energy transition of their business model.

Each issuer in the portfolio is assessed based on the efficiency of the measures taken to reduce their GHG emissions, change their energy mix and reduce their energy consumption.

Our partner Vigeo Eiris is responsible for applying this score.

For this, specific climate change criteria are analysed as are the main energy transition objectives of the companies and the relevant sectors. The score hinges on the efforts made by the companies to reduce their carbon footprint and contribute to the international target to prevent global warming from rising above 2°C.

The portfolio's contribution to the energy transition is measured based on the rating scale set out below:

$$\text{Score Transition Énergétique d'un portefeuille} = \sum [\text{Score Transition Énergétique de chaque titre} \times \text{poids de chaque titre}]$$

Portfolio's energy transition score

Energy transition score of each security x weighting of each security

based on the rating scale set out below:

Energy Transition Strategy Scale

Categories	Low	Underway	Convincing	Advanced
Score	0-29	30-49	50-59	60-100

Integration of the results of the ESG analysis into the investment process

- Voting at shareholders' meetings

As a holder of convertible bonds, we did not vote at any General Meeting during the past financial year.

- Implementation of an engagement strategy relating to issuers

Through Lazard Frères Gestion's equity funds, we may be shareholders of some of the companies to which the Lazard Convertible Global SICAV is exposed.

LAZARD CONVERTIBLE GLOBAL	Low	23
Thomson Reuters Convertible Index	Low	16

For this purpose, Lazard Frères Gestion publishes a report covering the various initiatives undertaken and their outcome. This information is the result of the various meetings held by the analysts/fund managers with companies' management teams.

- **USE OF FINANCIAL INSTRUMENTS MANAGED BY THE MANAGEMENT COMPANY OR AN AFFILIATED COMPANY**

The table of financial instruments managed by the management company or an affiliated company can be found in the notes to the UCI's annual financial statements.

- **METHOD USED TO CALCULATE GLOBAL RISK**

The Fund uses the commitment method to calculate its global risk on financial contracts.

- **SWING PRICING**

In order to protect the UCI's long-term shareholders, a swing factor will be applied to subscriptions and redemptions that have a significant impact on the UCI's outstandings, which may generate costs for shareholders entering and leaving the UCI that would otherwise have been allocated across all shareholders in the UCI. Therefore, if, on a particular NAV calculation date, the total net subscription/redemption orders of investors across all categories of UCI units or shares exceeds a threshold predetermined by the management company on the basis of objective criteria and expressed as a percentage of the net assets in the UCI, the NAV may be adjusted upwards or downwards to take account of the readjustment costs attributable to the net subscription/redemption orders. The NAV of each unit or share category shall be calculated separately, but any adjustment shall have an identical impact, expressed as a percentage, on all of the NAV calculations of each unit or share category in the UCI.

The cost parameters and trigger level shall be determined by the management company and shall be reviewed periodically, and at least every six months. These costs shall be estimated by the management company based on transaction fees, bid/offer spreads and tax charges applicable to the UCI.

Insofar as this adjustment mechanism is linked to the net balance of subscriptions/redemptions within the UCI, it is not possible to accurately predict a given time in the future at which swing pricing will be applied. Consequently, neither is it possible to predict the precise frequency at which the management company will have to make such adjustments, which shall not exceed 1% of the NAV (see prospectus). Investors should be aware that the volatility of the UCI's NAV may not reflect solely that of the securities in the portfolio arising from the application of swing pricing.

- **INFORMATION ON DISTRIBUTED INCOME ELIGIBLE FOR THE 40% ALLOWANCE (FOR DISTRIBUTING UCIs)**

Pursuant to the provisions of Article 41 sexdecies H of the French General Tax Code, income on distributing shares is subject to an allowance of 40%.

- **REMUNERATION**

The fixed and variable remuneration paid during the financial year ended on December 31st, 2018 by the management company to its personnel, pro rata their investment in the management of the AIFs, excluding the management of the UCITS and discretionary mandates, can be obtained on request by post from the UCI legal department of Lazard Frères Gestion, and are indicated in the company's annual report. The total variable remuneration is set by the Lazard Group based on different criteria, including the Lazard Group's financial performance over the past year, taking its earnings into account. The General Management decides on the total remuneration amount that will be split between the fixed and variable components, complying with the policy to maintain a complete separation between the fixed and variable components. All risks are incorporated into the calculation of the variable remuneration. It is then individualised and determined partly based on the performance of each identified member of staff.

Population at 31/12/2018: fixed-term and permanent contracts of LFG and LFG-Belgique

5. CERTIFICATION BY THE STATUTORY AUDITOR

**STATUTORY AUDITOR'S REPORT
ON THE ANNUAL FINANCIAL STATEMENTS
Financial year ended October 31st, 2019**

LAZARD CONVERTIBLE GLOBAL
UCITS ORGANISED AS A FRENCH OPEN-END INVESTMENT COMPANY
(*SOCIÉTÉ D'INVESTISSEMENT À CAPITAL VARIABLE*)
Governed by the French Monetary and Financial Code (*Code monétaire et financier*)

Management company
Lazard Frères Gestion SAS
25, Rue de Courcelles
75008 Paris, France

Opinion

In accordance with the terms of our appointment by the management company, we conducted our audit of the accompanying annual financial statements of the UCITS LAZARD CONVERTIBLE GLOBAL, as a French open-end investment fund, for the financial year ended October 31st, 2019.

We certify that the annual financial statements give a true and fair view of the results of the operations for the financial year under review and of the financial position and assets and liabilities of the UCITS at the end of said financial year, in accordance with the accounting rules and principles generally accepted in France.

Basis of our opinion

Audit standards

We conducted our audit in accordance with the professional standards applicable in France. We believe that our audit has provided us with sufficient relevant information on which to base our opinion. Our responsibilities under these standards are set out in the section of this report entitled "*Statutory auditor's responsibilities concerning the audit of the annual financial statements*".

Independence

We conducted our audit in accordance with the rules of independence applicable to us on the period from November 1st, 2018 to the date of issue of our report, and in particular we have not provided any services prohibited by the French code of ethics for statutory auditors.

*PricewaterhouseCoopers Audit, 63, Rue de Villiers, 92208 Neuilly-sur-Seine

LAZARD CONVERTIBLE GLOBAL

Basis of our opinions

In accordance with the provisions of Articles L. 823-9 and R. 823-7 of the French Commercial Code relating to the justification of our assessments, we inform you that the most important assessments we carried out, in our professional judgement, focused on the appropriateness of the accounting principles applied, the reasonableness of significant estimates used, and the presentation of all of the financial statements.

The assessments we have made are part of our audit of the annual financial statements as a whole and the opinion expressed above. We express no opinion on the elements of the annual financial statements taken in isolation.

Specific verifications

We have also performed, in accordance with applicable professional standards in France, the specific verifications required by the laws and regulations.

Information provided in the management report, other financial reports and the annual financial statements addressed to the shareholders

We have no matters to report regarding the true and fair presentation of the information provided in the management report and in the other documents sent to shareholders on the company's financial position and annual financial statements.

Information on corporate governance

We certify that the information required under Article L.225-37-4 of the French Commercial Code is provided in the section of the management report on corporate governance.

*PricewaterhouseCoopers Audit, 63, Rue de Villiers, 92208 Neuilly-sur-Seine

LAZARD CONVERTIBLE GLOBAL

Responsibilities of the management and persons charged with governance of the annual financial statements

It is the management company's role to draw up annual financial statements that give a fair and true picture in accordance with French accounting rules and principles and to implement the necessary internal control to be able to provide reasonable assurance that they are free from material misstatement, whether due to fraud or error.

As part of the preparation of the annual financial statements, the management company is responsible for assessing the UCI's capacity to continue operating as a going concern, to present in its financial statements, where necessary, information concerning business continuity, and to apply the accounting conventions of a going concern, unless it is planned to liquidate the UCI or terminate its activity.

The annual financial statements have been approved by the management.

Statutory auditor's responsibilities concerning the audit of the annual financial statements

Audit purpose and process

Our role is to prepare a report on the annual financial statements and to obtain reasonable assurance that the annual financial statements as a whole are free of material misstatements. Reasonable assurance means a high but not absolute level of assurance that an audit performed in accordance with professional standards is free of material misstatement. Anomalies may stem from fraud or errors and are considered material when it can reasonably be expected that, taken individually or together, they could influence the economic decisions of users of the financial statements.

As stipulated in Article L.823-10-1 of the French Commercial Code, our audit assignment does not consist in guaranteeing the viability or quality of the management of the UCI.

In the context of an audit performed in accordance with professional standards applicable in France, the statutory auditor must exercise its judgement throughout the course of the audit. Moreover:

- it identifies and assess the risks that the annual financial statements may contain material misstatements, whether from fraud or error, defines and implements audit procedures to resolve these risks, and collects all elements deemed necessary and appropriate in order to give its opinion. The risk of failure to detect a material misstatement resulting from fraud is higher than that resulting from an error because fraud may involve collusion, falsification, deliberate omissions, false statements or bypassing of internal controls;

*PricewaterhouseCoopers Audit, 63, Rue de Villiers, 92208 Neuilly-sur-Seine
Cedex, France, T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, www.pwc.fr*

LAZARD CONVERTIBLE GLOBAL

- it takes due note of the internal control relevant to the audit in order to define audit procedures that are appropriate to the circumstances, and not with a view to expressing an opinion on the efficiency of the internal control;
- it assesses the appropriateness of the accounting methods used and the reasonable nature of the accounting estimates made by the management company, and the related information provided in the annual financial statements;
- it assesses the appropriateness of the management company's application of the accounting policy for a going concern and, based on the information collected, whether there is a significant uncertainty linked to events or circumstances that is likely to call into question the UCI's capacity to continue operating as a going concern. This assessment is based on the information collected up to the date of the report, bearing in mind nevertheless that subsequent circumstances or events could jeopardise the continuity of operation. If the statutory auditor observes the existence of a material uncertainty, it shall draw the attention of the readers of its report to the information provided in the annual financial statements on the subject of this uncertainty, or if this information has not been provided or is not relevant, it shall attach reservations to its certification or shall refuse to certify the accounts;
- it assesses the overall presentation of the annual financial statements and whether they provide a true picture of the underlying operations and events.

To the Shareholders,

In our capacity as statutory auditors of your company, we hereby present to you our report on related party agreements.

We are required to report to you, based on the information with which we have been provided, on the main characteristics and terms, as well as details of the related benefits for the SICAV, of any agreements disclosed to us or that we may have identified during our audit, without being required to comment on their relevance or substance, or to identify any other agreements. It is your responsibility, pursuant to the terms of Article R.225-31 of the French Commercial Code (*Code de commerce*), to assess the benefits of entering into these agreements, prior to approving them.

We are also required, where applicable, to report to you as provided for in Article R.225-31 of the French Commercial Code on the performance over the past year of any agreements already approved by the shareholders' meeting.

We have performed those checks that we considered necessary in accordance with the professional guidance issued by the national auditing body (*Compagnie nationale des commissaires aux comptes*) relating to this operation.

**AGREEMENTS SUBMITTED TO THE APPROVAL OF THE SHAREHOLDERS'
MEETING**

We hereby inform you that we have not been advised of any agreement authorised during the past financial year to be submitted to the approval of the shareholders' meeting pursuant to Article L.225-38 of the French Commercial Code.

AGREEMENTS ALREADY APPROVED BY THE SHAREHOLDERS' MEETING

We hereby inform you that we have not been advised of any agreement already approved by the shareholders' meeting that remained effective during the past financial year.

1. ACCOUNTING RULES AND PRINCIPLES

The annual financial statements are presented in accordance with regulation 2014-01, as amended, of the French accounting standards body (*Autorité des Normes Comptables* - ANC).

The general accounting principles apply:

- true and fair view, comparability, business continuity,
- regularity, sincerity,
- prudence,
- permanence of the accounting methods used each year.

Income from fixed-income securities is recorded on the basis of accrued interest.

Purchases and sales of securities are recorded excluding expenses. The accounting currency of the portfolio is the euro. The financial year comprises 12 months.

Asset valuation rules

Financial instruments and securities traded on a regulated market are valued at their market price.

- **Shares and similar securities** are valued on the basis of the last known price on their main market. If applicable, prices are translated into euros using the exchange rate prevailing in Paris on the valuation day (as published by WM Closing).

- **Fixed-income securities:**

Fixed-income securities are for the most part marked to market based on either Bloomberg prices (BGN)[®] derived from averages of contributed prices, or on those of direct contributors.

There may be a discrepancy between the carrying amounts, valued as indicated above, and the actual disposal prices that would be obtained if a portion of these portfolio assets were to be sold.

- **Bonds and similar instruments** are valued on the basis of the average of the closing prices gathered from several contributors.

Financial instruments whose prices have not been determined on the valuation day or whose prices have been adjusted are valued at their probable trading price under the responsibility of the management company. These estimates and their supporting documentation will be provided to the statutory auditor during audits.

However, the following instruments are valued using the following specific methods:

- **Negotiable debt securities:**

- **Negotiable debt securities with a residual maturity of more than three months:**

Negotiable debt securities traded in large volumes are valued at market price.

In the absence of significant trading volumes, these securities are valued using an actuarial method, with a benchmark rate plus, where applicable, a margin representative of the issuer's intrinsic features.

Benchmark rate	
Negotiable debt securities in euros	Negotiable debt securities in other currencies
Euribor, OISs and BTFs - 3 - 6 - 9 - 12 months BTANs - 18 months, 2 - 3 - 4 - 5 years	Official key rates in the relevant countries

- **Negotiable debt securities with a residual maturity of three months or less:**

Negotiable debt securities with a residual maturity of three months or less are valued using the straight-line method. However, this method would not be applied if any of these securities were particularly sensitive to market movements.

o **UCIs:**

Units or shares of UCIs are valued at the last known net asset value.

Units or shares of UCIs for which net asset values are published monthly may be valued on the basis of interim net asset values calculated from estimated prices.

o **Temporary purchases and sales of securities:**

Securities purchased under repurchase agreements are valued at their contract price using an actuarial method with a benchmark rate (overnight EONIA, one- or two-week interbank rates, one- to 12-month EURIBOR) corresponding to the term of the contract.

Securities sold under repurchase agreements continue to be valued at their market price. Liabilities on securities sold under repurchase agreements are calculated using the same method as that used for securities purchased under repurchase agreements.

o **Futures and options:**

Futures and options are valued on the basis of intraday trading prices the timing of which is based on that of the valuation of the underlying assets.

Positions taken on the futures or options markets and over the counter are valued at their market price or at the value of the equivalent underlying asset.

➤ **Financial instruments and securities not traded on a regulated market**

All of the UCI's financial instruments are traded on regulated markets.

➤ **Valuation methods for off-balance sheet commitments**

Off-balance sheet transactions are valued at the commitment value.

The commitment value for futures contracts is equal to the price (in the SICAV's currency) multiplied by the number of contracts multiplied by the face value.

The commitment value for options is equal to the price of the underlying security (in the SICAV's currency) multiplied by the number of contracts multiplied by the delta multiplied by the face value of the underlying security.

The commitment value for swaps is equal to the face value of the contract (in the SICAV's currency).

Management fees

Management fees are calculated on each valuation day.

The annual management fee rate is applied to gross assets (equal to net assets before deduction of the day's management fees) less UCIs managed by Lazard Frères Gestion SAS using the following formula:

Gross assets – UCIs managed by Lazard Frères Gestion x operating and management fees rate x number of days between the NAV calculation date and the previous NAV calculation date
365 (or 366 in a leap year)

- The SICAV pays the operating fees, which include:

- . financial management;
- . administration and accounting;
- . custody services;
- . other operating fees:
 - . statutory auditors' fees;
 - . legal notices (Balo, Petites Affiches, etc.) if applicable.

These fees do not include transaction charges.

The fees break down as follows, as set out in the regulations:

<i>Expenses charged to the SICAV</i>	<i>Basis</i>	<i>Rate</i>	
Financial management fees	Net assets excluding UCIs managed by Lazard Frères Gestion SAS	IC EUR shares: Maximum 0,815% incl. taxes RC EUR shares: Maximum 1,465% incl. taxes RD EUR shares: Maximum 1,465% incl. taxes K shares: Maximum 0,815% incl. taxes ID EUR shares: Maximum 0,815% incl. taxes IC USD shares: Maximum 0,815% incl. taxes RC USD shares: Maximum 1,465% incl. taxes RD USD shares: Maximum 1,465% incl. taxes IC H-EUR shares: Maximum 0,865% incl. taxes ID H-EUR shares: Maximum 0,865% incl. taxes IC H-CHF shares: Maximum 0,915% incl. taxes IC H-USD shares: Maximum 0,915% incl. taxes RC H-EUR shares: Maximum 1,515% incl. taxes TC EUR shares: Maximum 0,815% incl. taxes T H-EUR shares: Maximum 0,865% incl. taxes TC GBP shares: Maximum 0,815% incl. taxes TD GBP shares: Maximum 0,815% incl. taxes RC H-USD shares: Maximum 1,52% incl. taxes RD H-USD shares: Maximum 1,52% incl. taxes RC H-HKD shares: Maximum 1,52% incl. taxes RC H-SGD shares: Maximum 1,52% incl. taxes	
Administrative fees external to the management company	Net assets	For all share categories: Maximum 0,035% incl. taxes	
Turnover commission (0 to 100% received by the management company and 0 to 100% received by the custodian)	Maximum charge incl. taxes on each transaction	Equities, convertible bonds and similar instruments and foreign exchange	From 0% to 0,25%
		Futures	None
Performance fee	n/a	None	

The method used to calculate retrocession amounts is set out in the sales and marketing agreements.

- If the amount is significant, a provision is recognised in account 617.

- The final amount is recognised upon settlement of invoices after reversal of any provisions.

Allocation of distributable income

Definition of distributable income:

Distributable income consists of:

Net income:

Net income for the financial year is equal to the amount of interest, arrears, bonuses and prizes, dividends, directors' fees and all other income generated by the securities that make up the portfolio, plus income generated by temporary cash holdings, minus the amount of management fees and borrowing costs. Retained earnings are added, plus or minus the balance of the revenue adjustment account.

Capital gains and losses:

Realised capital gains, net of expenses, less realised capital losses, net of expenses, recognised for the financial year, plus any net capital gains of the same kind recognised over previous years that have not been distributed or accumulated, plus or minus the balance of the capital gains adjustment account.

Allocation of distributable income:

<i>Distributable income</i>	<i>ID H-EUR, RD EUR, RD USD, RD H-USD, TD GBP and ID EUR shares</i>	<i>K and TH-EUR shares</i>	<i>IC H-EUR, RC EUR, RC USD, RC H-EUR, RC H-USD, RC H-HKD, RC H-SGD, IC EUR, IC USD, IC H-USD, TC EUR, TC GBP and IC H-CHF shares</i>
Allocation of net income	Distribution	Accumulation and/or distribution and/or retention	Accumulation
Allocation of net realised capital gains or losses	Accumulation and/or distribution and/or retention	Accumulation and/or distribution and/or retention	Accumulation
