The investment objective is to match or exceed the performance, net of expenses, of the benchmark, the Euro Stoxx, over the recommended investment period.

## FUND MANAGERS COMMENT

Months come and go, but each month is different. March's worries had been followed by optimism in April. Whereas in May, panic prevailed. Disappointed by no sign of an imminent agreement between China and the United States, and concerned by the political shambles in the UK reawakening the spectre of a no-deal Brexit, the markets slumped. The Euro Stoxx shed 5,7% during the month, hit by the collapse in long-term US interest rates, with the 10-year Treasury note losing nearly 40bp to drop from 2,50% to 2,10%, a long way from the 3,25% achieved at the end of November 2018. Every cloud has a silver lining, and there was also a sharp fall in the price of a barrel of oil, from \$72 to \$62. That said, the fund was severely affected by this cyclical rotation and lost its April gains in May, with a fall of 8,18%. There was very little in the way of individual company news during May, and prices were essentially driven by thematic movements. The fund was hurt by its exposure to automobiles and commodities but benefited from the stock-picking effect in industrial goods and retail. It was adversely affected by the falls of ArcelorMittal, Air France, Aperam, Continental and STMicroelectronics, but benefited from the good performances of Alstom, Roche Holding, Reckitt Benckiser and Atos.
