INVESTMENT POLICY

The investment objective is to match or exceed the performance, net of expenses, of the benchmark, the Euro Stoxx, over the recommended investment period.

FUND MANAGERS COMMENT

June brought a period of hand-wringing, with the markets in skittish mode. The Eurostoxx made up almost all of the ground lost in May, underpinned by some tweets ahead of the G7 on the one hand, and the ongoing fall in interest rates which reached further record lows, on the other. Yields on the Bund smashed their June 2015 record of -19bp, closing the month of June at -0,33%. 10-year French yields moved into negative territory for the first time ever. Oil, supported by OPEC, attempted a minor rebound. The dollar weakened over the month, losing nearly 2%, on fears that the Fed in turn would return to a highly accommodative monetary policy. Against this backdrop, the banks obviously struggled but the market as a whole rose by 5,23%. Bolstered by good choices in technology, commodities, agri-food and travel and leisure, the fund outperformed slightly, rising by 5,52%. It suffered from a weak performance by Reckitt Benckiser, which lost the gains made on the announcement of a change of CEO, by KBC, Société Générale and Publicis which was the subject of fresh distrust by the consensus. It benefited, however, from the rebound of Aperam, ArcelorMittal, STMicroelectronics, Ingenico, and Cap Gemini which announced a public bid for Altran.
