INVESTMENT POLICY

The investment objective is to match or exceed the performance, net of expenses, of the benchmark, the Euro Stoxx, over the recommended investment period.

FUND MANAGERS COMMENT

In June, optimism dominated once again. On the macro front, US figures were very encouraging despite the epidemic spreading to states it had not yet reached. Overall, the first indications from companies for the second quarter are more positive than what could have been feared, with the exception of sectors related to air transport. The equity markets also continued to be buoyed by flows on the whole and thus indirectly by the liquidity injections from central banks. The Euro Stoxx gained 4,92% in June and the fund outperformed by 110 basis points to +6,02%. It was hurt by its positions in retail and industrial goods, as well as by the underperformances of Aperam, Continental and Sampo, while benefiting from the rebound in banking and financial services and good stock picks in technology. In relative terms, the fund benefited from the absence of Wirecard (which plummeted by 96% following the scandal). Ingenico, Peugeot, Atos and Crédit Suisse also made positive contributions.
