## INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

## FUND MANAGERS COMMENT

The rise in the European equity market that started in January carried on into February, driven by the increasing likelihood of a US-China trade agreement, a lull in Europe on the social and political fronts, the possibility of a Brexit delay and an overall improvement in most emerging countries. The fund was negatively affected by Swedbank's poor performance, the bank being embroiled in an alleged case of non-compliance with its regulatory obligations. Deutsche Boerse consolidated after a stellar performance. Volkerwessels made a positive contribution, not having incurred any cost overruns in an infrastructure project in the Netherlands. Positive surprises came from Sopra Steria and Heineken, which delivered a reassuring message about their margin outlook.
