## INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

## FUND MANAGERS COMMENT

March was marked by the very dovish speeches of the European Central Bank followed by the Fed. In-between their respective statements, a number of disappointing confidence indicators, particularly in Europe, convinced investors that rates would remain very low for a very long time. The TBond yield fell from 2,75% to 2,40% over the month, while the German 10-year yield fell below the 0% mark on March 21st and remained negative until the end of the month. In this context, risk aversion in the equity markets went back on the rise and while the Eurostoxx fluctuated only slightly (+1,39%), this actually masked a very high sector and thematic rotation in favour of the stocks least sensitive to the economic situation. The fund recorded a significant outperformance, attributable mainly to an allocation effect (underweight positions in chemicals, automotive and banks).
