INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

FUND MANAGERS COMMENT

After some pessimism in March due to central bank rhetoric, markets were reassured by the lessening probability of a hard Brexit, signs of a possible US-China trade agreement and generally encouraging figures out of emerging countries. This was followed by a spectacular thematic rotation in the first half of April. The fund underperformed over the period. Although it benefited from a positive allocation effect in the oil and gas, utilities and insurance sectors, it was hurt by a negative allocation effect in real estate and a negative stock-picking effect in the technology sector (absence of SAP, presence of Tieto).

*Risk scale : Derived from the historic volatility of the fund over a period of 5 years. The management company reserves the right to adjust the level of risk calculated according to the specific risk of the fund. This risk scale is supplied as a rough guide and may be modified without advance notice. Risk 1 does not mean a risk-free investment. This indicator may change over time.
