INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

FUND MANAGERS COMMENT

In December, the market maintained the momentum of 2019 with a further rise of 1,23%. It ended the year very close to its highest levels with a rise of 26,11% over twelve months. Risk-free rates continued to inch up in Europe, putting on a further 10bp, with a rise in commodities, particularly oil, following the announcement of a phase 1 agreement between China and the United States. The fund gained 0,7% (C Share) in December, hurt by a negative allocation effect in banking and retail, these sectors being underweighted in the portfolio. On the other hand, it benefited from a positive stock-picking effect in healthcare (Sanofi) and banks (Sbanken and Swedbank) and a positive allocation effect in automotive, which was underweighted in the portfolio.
