## INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

## FUND MANAGERS COMMENT

In October, the prospect of a no-deal Brexit almost faded away while a trade agreement between the United States and China appeared to be moving forward. Investors' risk appetite therefore increased. In Europe, long-term interest rates tightened to some extent despite Mario Draghi's last stand at his last meeting as ECB president, while equity markets were on the rise. The Bund's yield fell from -0,60% to -0,40% and the Euro Stoxx gained 1,25% to end the month very close to its highest level of the year, while the fund gained 1,11%. It was hurt by a negative allocation effect in the automotive sector (underweighted). On the other hand, it benefited from the absence of Anheuser-Busch and the Reggeborgh family's bid for Volkerwessels.
