#### INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

#### **FUND MANAGERS COMMENT**

June brought a period of dithering, with the markets no longer knowing where to turn. After declining in May, the Eurostoxx recouped most of its losses, driven by a few presidential tweets ahead of the G7, also by the continued fall in interest rates, which kept on moving to new lows. Yields on the Bund smashed their June 2015 record of -19bp, closing June at -0,33%. 10-year French yields moved into negative territory for the first time ever. Oil, supported by OPEC, attempted a minor rebound. The dollar weakened over the month, losing nearly 2%, on fears that the Fed in turn would return to a highly accommodative monetary policy. Against this backdrop, banks obviously struggled but the market as a whole rose by 5,23%. Helped by a low exposure to the banking sector but negatively affected by real estate and technology, the fund underperformed with a rise of 2,63%. It was hurt by Nexity, which is affected by concerns about a possible slowdown in activity, by its exposure to property companies (Grand City Properties, Klepierre), which struggled over the month, and by its lack of exposure to a number of large groups such as SAP, Bayer and LVMH. On the other hand, it benefited from the rebound of Imerys and the good performances of Air Liquide, Fraport and Deutsche Post.
