INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

FUND MANAGERS COMMENT

While February started on an upbeat note, buoyed by good earnings releases on the whole, the spread of Covid-19 outside China and the alarming situation that began to emerge in Italy, in particular, dampened the mood and triggered a burgeoning panic movement in the last week of the month. The Eurostoxx ended the month down 7,86%, while the fund lost 7,28%. Its underexposure to the technology and utilities sectors and overexposure to the insurance sector weighed on performance. Conversely, the stock-picking effect made a positive contribution, particularly in the travel and leisure sector (FDJ) and the beverages sector (absence of Anheuser-Busch).

Current expenses	2,40%

*Risk scale : Derived from the historic volatility of the fund over a period of 5 years. The management company reserves the right to adjust the level of risk calculated according to the specific risk of the fund. This risk scale is supplied as a rough guide and may be modified without advance notice. Risk 1 does not mean a risk-free investment. This indicator may change over time.

CHANGE IN NET ASSET VALUE (NAV)

Past performance is not a guarantee of current or future performance and increases at the end of the recommended investment period.
