INVESTMENT POLICY

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested, with a lower volatility and a controlled compared risk.

FUND MANAGERS COMMENT

Sadly, new restrictive measures had to be implemented almost everywhere in Europe, even to the point of a virtually total lockdown, as was the case in France with some other countries following suit. The resumption of the epidemic in the United States was also a source of concern for the markets, but it was the prospect of the election of poll favourite Joe Biden that dominated the behaviour of the US bond market, where yields tightened, while in Europe the Bund yield fell from -0,52% to -0,62%. The Euro Stoxx fell by 5,73%. The fund lost 5,99% (C unit), hurt by its stock picks in consumer products and services, food and real estate. Merlin Properties, Essity and Danone made the main negative contributions to performance. Conversely, positive contributions came from Orange and La Française des Jeux, as well as the absence of SAP and Bayer.

Performance fees	Nil
Current expenses	2,40%

*Risk scale : Derived from the historic volatility of the fund over a period of 5 years. The management company reserves the right to adjust the level of risk calculated according to the specific risk of the fund. This risk scale is supplied as a rough guide and may be modified without advance notice. Risk 1 does not mean a risk-free investment. This indicator may change over time.

CHANGE IN NET ASSET VALUE (NAV)

Past performance is not a guarantee of current or future performance and increases at the end of the recommended investment period.
