INVESTMENT POLICY

The investment objective is to regularly outperform the EURO STOXX index over the medium term, with lower volatility and a controlled relative risk. The portfolio comprises Euro zone large caps. These companies: (i) satisfy Lazard's requirement for healthy and sustainable profits; and (ii) adopt a sustainable-development approach, focusing particularly on social and environmental criteria.

FUND MANAGERS COMMENT

March was marked by the very dovish speeches of the European Central Bank followed by the Fed. In-between their respective statements, a number of disappointing confidence indicators, particularly in Europe, convinced investors that rates would remain very low for a very long time. The TBond yield fell from 2,75% to 2,40% over the month, while the German 10-year yield fell below the 0% mark on March 21st and remained negative until the end of the month. In this context, risk aversion in the equity markets went back on the rise and while the Eurostoxx fluctuated only slightly (+1,39%), this actually masked a very high sector and thematic rotation in favour of the stocks least sensitive to the economic situation. Against this backdrop, the fund recorded a gain of 0,72%, hurt by commodities and industrial goods in particular, with the declines of Aperam and Imerys, as well as by the underperformances of Carrefour, ING and Rexel. On the other hand, the fund benefited from strong stock picks in agri-food, technology and healthcare, with rises by Unilever, SAP and Merck KGaA, as well as Orange and Deutsche Telekom.

*Risk scale : Derived from the historic volatility of the fund over a period of 5 years. The management company reserves the right to adjust the level of risk calculated according to the specific risk of the fund. This risk scale is supplied as a rough guide and may be modified without advance notice. Risk 1 does not mean a risk-free investment. This indicator may change over time.
