## MANAGER(S)

# **INVESTMENT POLICY**

The management objective aims to achieve, based on a minimum investment term of five years, a performance greater than the Euro Stoxx index, net dividends reinvested.

## **FUND MANAGERS COMMENT**

Months come and go, but each month is different. March's worries had been followed by optimism in April. Whereas in May, panic prevailed. Disappointed by no sign of an imminent agreement between China and the United States, and concerned by the political shambles in the UK reawakening the spectre of a no-deal Brexit, the markets slumped. The Euro STOXX shed 5,7% during the month, hit by the collapse in long-term US interest rates, with the 10-year Treasury note losing nearly 40 bps to drop from 2,50% to 2,10%, a long way from the 3,25% achieved at the end of November 2018. Every cloud has a silver lining, and there was also a sharp fall in the price of a barrel of oil, from \$72 to \$62. The fund resisted after a fashion, dropping by 5,53% and thus delivering outperformance of 17 basis points. There was little in the way of individual company news during May, and prices were essentially driven by thematic movements. As such, the fund suffered from being underweight utilities and from its stock-picking in commodities, while it benefited from its stock-picking in banking and technology. It was hindered by falls at Aperam, Rexel, Ryanair and Voestalpine, but profited from the good performances of Alstom, Kerry Group, Coface, Deutsche Boerse and Deutsche Telekom.
