INVESTMENT POLICY

Over a recommended investment horizon of 5 years minimum, the management aim is to outperform the Euro Stoxx index, net reinvested dividends.

FUND MANAGERS COMMENT

There was some positive macroeconomic news in September, notably confirmation of European GDP growth at an annualised rate of more than 2%, as well as the announcement of a massive tax cut plan in the United States (both corporate and income tax). Against this backdrop, the Euro Stoxx gained 4,51% over the month. The fund underperformed significantly with a rise of 3,07%. Some cyclical sectors such as automotive, construction, industrial goods and chemicals outperformed, while real estate, agri-business and telecoms remained stable over the month. Our stock picks proved detrimental in September. The fund was hurt more particularly by its exposure to Liberbank and the National Bank of Greece, which have both been sold since, down 28% and 12%, respectively, while highly dilutive capital increases loom on the horizon. The fund was also hurt by its exposure to commodities (ArcelorMittal, Voestalpine), as the sector declined during the month. Conversely, it benefited from the good performances of Wienerberger, UBI Banca, Peugeot and Ipsos.
