INVESTMENT POLICY

Over a recommended investment horizon of 5 years minimum, the management aim is to outperform the Euro Stoxx index, net reinvested dividends.

FUND MANAGERS COMMENT

After some pessimism in March due to central bank rhetoric, markets were reassured by the lessening probability of a hard Brexit, signs of a possible US-China trade agreement and generally encouraging figures out of emerging countries. This was followed by a spectacular thematic rotation in the first half of April. The portfolio benefited from this sector rotation, ending the month up 6,47% (1 share) compared with 5,02% for the Euro Stoxx. The fund was hurt by the poor performances of Metrovacesa and Nexity in real estate, but it benefited from the rebound of several industrial mid caps, notably Kion, Synergie, Ipsos and Palfinger.
