MANAGEMENT

INVESTMENT POLICY

The investment strategy will be based mainly on a ‘carry’ type management (purchase of securities to hold them in the portfolio until their maturity) until the early redemption date at the option of the issuer or the holder). The portfolio manager can actively manage the strategy by selling a security, buying a new security. Investment Grade Corporate Bonds, High Yield Corporate Bonds and Financial Institutions Bonds. The strategy invests only in securities issued by issuers whose headquarters are in an OECD member country and/or in securities listed on a stock exchange in one of these countries. Achieve a gross yield between 2.2% and 2.7% (including the potential impact of default²) by investing mainly in fixed Income instruments issued by companies and financial institutions. These investments are made without any financial rating constraints, denominated in euro and/or US dollar and/or pound sterling.

FUND MANAGER'S COMMENT - Benjamin Le Roux

Long-term interest rates diverged on either side of the Atlantic in March, with the yield spread between the T-Note and the 10-year Bund now standing at 2.0%, up 37bp over the month. This development reflects growth and inflation prospects as well as the clearly stronger vaccination momentum in the United States. The health situation is continuing to deteriorate in continental Europe, forcing governments to introduce or tighten restrictive measures and the ECB to strengthen its support for the economy, with the announcement of a significant increase in its asset purchases in the coming quarter. This news contributed to the continued tightening of spreads between Eurozone countries, with the German Bund and the Italian 10Y BTP falling by 3bp and 9bp respectively in March to -0.29% and +0.67%.

Credit presented a mixed picture over the month: the credit margin against government bonds widened slightly by 1bp for senior corporate credit to 83bp and by 2bp for senior financial credit to 79bp, while it tightened by 6bp for subordinated financials to 141bp and by 13bp for IG corporate hybrids to 194bp (ICE BofAML indices). Spread tightening occurred mainly in the second week of the month following the ECB meeting announcing an acceleration of its asset purchase programme. All sectors were in the green, especially automotive, leisure and energy, while defensive sectors (consumer goods, utilities, healthcare) performed less well.

For financial issuers, the end of the month was marked by the setbacks of the Archegos fund and the losses incurred by its prime brokers, particularly Credit Suisse which came in for a battering after issuing a statement indicating “a significant impact in Q1”. CS finally reported an impact of CHF4.4bn, but this should result in a pre-tax loss of CHF900m thanks to stellar Q1 revenues. The CS share fell by 19% in the last week of the month and the AT1 by between 2% and 5%. Unsurprisingly, S&P, Fitch and Moody’s placed the bank’s rating on negative outlook. The primary market was active in March, driven in particular by Daimler, Stellantis (first issue since its upgrade to IG category), Holcim, Booking, Mondelez, Safran (first issue since its upgrade to IG, BBB+ rating, stable outlook by S&P at the end of February), Prologis (green format), Ahold Delhaize (SLB format) and Enel (double hybrid tranche). With a total of €35bn issued according to Barclays, volumes were nevertheless down compared with March 2020 (€49bn). On the financial side, a total of €32bn was issued according to Barclays, with BFCM, UBS and Intesa (green format) in the Senior segment, Alpha Bank, Barclays, Société Générale in Tier 2 banks, and Hannover Re, Storebrand and AXA in insurance companies, the last two in green format.

The portfolio’s structure remains unchanged against a backdrop of relatively stable benchmark rates and tighter margins for subordinated and HY credit. The portfolio’s ESG profile also remains unchanged.

As a reminder, the subscription period ended on March 31st, 2021. As of April 1st, 2021, the fund is now valued at bid price.

Lazard Frères Gestion informs you that the management company has updated the provisions relating to the inclusion of environmental, social and governance (ESG) criteria in the KIIDs and prospectuses of its Funds in accordance with EU Regulation 2019/2088 on the publication of sustainability information in the financial services sector and with AMF Position-Recommendation 2020-03 on collective investments incorporating extra-financial approaches.
